NIST has not submitted comments or rebuttals. The Editor's response is the only set of statements from NIST

| Comment Number | Comment | Editor's Response |
|---|---|---|
| 1 | The 1-2010 draft contains the first publiscation of the Extended Feature Set (EFS) format for this ANSI/NIST standard. Annex F has yet to be marked up for XML encoding. | The encoding instructions for the Traditional encoding in the first draft that related to EFS have been removed. XML for the NIEM-conformant encoding will only get developed if EFS is approved to be included in the standard (as content-based field descriptions) |
