

	Calling Serving RFSS	Group Home RFSS	Called Serving RFSS	Number of ISSI interfaces
G8				2
	<p>Here each RFSS only has one function. A group call initiated from a serving RFSS. The home RFSS invites another serving RFSS to participate in the group call.</p>			
G7				1
	<p>Here an RFSS functions as both the group home RFSS, as well as initiating the group call. The group home RFSS invites another serving RFSS to participate in the group call.</p>			
G6				1
	<p>Here an RFSS functions both as the group home RFSS and as a serving RFSS.</p>			
G4				1
	<p>Here an RFSS functions both as a serving RFSS for the SU initiating the group call and as a serving RFSS for another SU participating in the group call.</p>			
G1				0
	<p>Here an RFSS functions both as the group home RFSS and as the serving RFSS. NOTE: In this case there is no ISSI, therefore all happens internally to the single RFSS.</p>
