# CHAPTER 1

## POLICIES

### A. Introduction

The calibration services of the National Institute of Standards and Technology (NIST) are designed to help the makers and users of precision instruments achieve the highest possible levels of measurement quality and productivity. The services listed in this Fee Schedule constitute the highest order of calibration services available in the United States. They directly link a customer's precision equipment or transfer standards to national and international measurement standards. These services are offered to public and private organizations and individuals alike.

For more specific information, the NIST Calibration Services Users Guide, SP 250, contains data on uncertainty and other technical references. Copies are available upon request or consult our website (see Section L of this chapter).

### B. ProForma Invoice

Please be advised that for non-U.S. government agencies, starting 01 January 2013, a new legal document (Calibration Service Pro Forma Invoice) containing the NIST calibration service terms and conditions are required for all calibration services. This document is a Calibration Cooperative Research and Development Agreement (C-CRADA) between your company and NIST. In general, this C-CRADA protects your calibration information as well as providing you with a firm price quote, explaining invoicing information, and information on the NIST quality system and traceability. In addition to the legal terms and conditions, the Calibration Service Pro Forma Invoice is used in two primary ways: 1) to create a firm price quote prior to submission of a company purchase order or 2) to create a firm price quote after receipt of a company purchase order. In either case, a signed copy of the Calibration Service Pro Forma Invoice by the authorized company representative is required by NIST. The terms and conditions of the Calibration Service Pro Forma Invoice supersede any conflicting and/or additional terms and conditions contained in a company's purchase order.

For U.S. government agencies, an agreement is required in lieu of the Calibration Service Pro Forma Invoice. Please contact Nancy Selepak ([nancy.selepak@nist.gov](mailto:nancy.selepak@nist.gov)) for assistance.

### C. Types of Calibration Services

- Calibration Services
- Special Tests
- Measurement Assurance Programs (MAPs)

NIST provides Calibration Services using well-characterized, stable and predictable measurement processes. NIST calibrates instruments and devices that are metrologically suitable as reference or transfer standards.

**Special Tests** are so designated for one or more of the following reasons: (1) the specific type of calibration is seldom requested, thus precluding the maintenance of a large statistical base for characterizing the measurement process; (2) the test requested is unique; or (3) the service is still under development – meaning the measurement or calibration methods are still being perfected, or all the quality-control documentation has not been completed.

**Measurement Assurance Programs** are quality control programs for calibrating a customer's entire measurement system. In a typical MAP, a stable artifact or set of artifacts called transfer standards are first measured by NIST and then sent to a customer's laboratory for a series of measurements. The transfer standards are then returned to NIST for re-measurement, along with the participating laboratory's results.

NIST reports its comparative findings to the customer and, when necessary, offers guidance on achieving and maintaining measurement quality. Successful use of a NIST MAP requires that the customer make periodic measurements of in-house check standards to estimate their measurement process uncertainty and to ensure that the measurement process remains in a state of statistical control. Unless a laboratory has a measurement quality assurance program to monitor its own measurement process parameters continuously, there is no value in participating in a MAP. In fact, NIST recommends that its customers establish and use a measurement quality assurance program to monitor their measurement parameters, whether or not they participate in a MAP.

## **D. Criteria for Quality Assurance**

All the measurement services listed in this document meet rigorous criteria for quality assurance. Calibration Services and MAPs satisfy the most demanding and explicit requirements in that they are carried out regularly under pre-established and well-defined conditions; the measurement processes involved are well-characterized, stable, and statistically controlled; and quality-control procedures are well-defined and strictly followed. Furthermore, each Calibration Service or MAP is planned and documented to permit continuity of service over time.

## **E. Quality**

NIST has implemented a quality system for its measurement services. The NIST Quality System, [www.nist.gov/qualitysystem/](http://www.nist.gov/qualitysystem/) (NIST QS) comprises policies and procedures that are documented in the NIST Quality Manual (NIST QM). NIST commits that the NIST QS be, to the extent allowed by statute and regulation, in conformity with the international standard ISO/IEC 17025 and the relevant requirements of ISO Guide 34 as they apply to the Standard Reference Materials® (SRMs) and related services that NIST delivers. In general the scope of the NIST quality system for measurement services encompasses all services listed in the NIST Special Publication (SP) 250, NIST Calibration Services Users Guide and the NIST Special Publication (SP) 260, Standard Reference Materials Catalog.

## **Fees**

NIST recovers the cost of providing calibration services by charging a fee for each calibration performed. The costs of services are published in the Fee Schedule, which is updated and published annually to reflect changes in prices and services. Even so, the cost of many services varies according to your exact calibration specifications; you must therefore provide the technical contact with an exact description of work before receiving a price quote.

**NOTE: Fees for NIST services do not include shipping costs or insurance.**

## **F. Reports of Calibration/Test Results**

Reports on calibrations or other services are the property of the customer. Copies are supplied to other parties only as required by federal law or requested in writing by the customer. The results of calibrations and tests performed by NIST apply only to the specific instrument or standard at the time of test unless otherwise clearly stated.

## **G. Traceability**

The primary purpose of the NIST Policy on Traceability is to state the NIST role with respect to traceability. The Policy presents the definition of measurement traceability used by NIST, and clarifies the roles of NIST

and others in achieving traceability of measurement results for measurements both internal and external to NIST.

The NIST Policy on Traceability also addresses the role of NIST in providing its customers with the tools they need (a) to assist them in establishing traceability of their measurement results, and (b) to assess the claims of traceability made by others. This is achieved directly through the provision of NIST measurement-related products and services, through collaboration with relevant organizations, through development and dissemination of technical information on traceability, and through conducting coordinated outreach programs.

Merely having an instrument or artifact calibrated at NIST is not enough to make the measurement result traceable to reference standards developed and maintained by NIST. To establish traceability to such reference standards, there must be an unbroken chain of comparisons and each provided measurement must be accompanied by a statement of uncertainty. The measurement system by which values are transferred must be clearly understood and under control. The dates and details of each link in the chain must also be provided.

Although NIST supports making the user aware of traceability and provides the user with details as to how traceability is established, NIST does not allow the prominent display of its name on proprietary products or in the advertising of them (See Section J of this chapter).

## **H. Reporting Measurement Uncertainty**

To ensure that NIST uncertainty statements are consistent across the organization and with international practice, NIST policy requires that all NIST measurements be accompanied by statements of uncertainty as discussed in NIST Technical Note 1297<sup>1</sup>.

NIST reports its calibration results, with the measurement values accompanied by the uncertainties associated with the methods, operators, and environment at NIST. Users of these calibration services will make their own measurements with the calibrated instruments or artifacts. In addition to the uncertainty indicated by NIST, other uncertainties are inherent in the instrument, associated with the method or protocol in using the instrument, with the operator of the instrument, and with the physical environment (pressure, temperature, humidity, etc.) in which the measurements are made. Thus, the measurements made with the calibrated instruments or artifacts by organizations outside of NIST have total uncertainty budgets associated with them, only one component of which is the uncertainty reported to them by NIST.

## **I. Use of Metric (SI) Units**

In accordance with the Metric Conversion Act of 1975 as amended by Section 5164 of the Omnibus Trade and Competitiveness Act of 1988 and as required by related provisions of the Code of Federal Regulations, the National Institute of Standards and Technology (NIST) uses the modern metric system of measurement units (International System of Units—SI) in all publications. When the field of application or the special needs of users of NIST publication require the use of non-SI units, the values of quantities are first stated in the SI units and the corresponding values expressed in non-SI units follow in parentheses. Copies of NIST SP 811<sup>3</sup> are available upon request (see Section L) or on the web site: [www.nist.gov/pml/pubs/](http://www.nist.gov/pml/pubs/)

## **J. Reference to NIST in Advertisements**

The NIST measurement/test results or reports shall not be used to indicate or imply that NIST approves, recommends, or endorses the manufacturer, supplier, or user of any instruments or standards or that NIST in any way guarantees or predicts the future performance of items after calibration or test. No reference shall be made to NIST or to reports or results furnished by NIST in any advertising or sales promotions, which would indicate or imply that NIST approves, recommends, or endorses any proprietary product or proprietary material.

## **K. Disclaimer**

Commercial products, materials, and instruments, are identified in our communications and documents for the sole purpose of adequately describing experimental or test procedures. In no event does such identification imply recommendation or endorsement by NIST of a particular product; nor does it imply that a named material or instrument is necessarily the best available for the purpose it serves.

## **L. Questions and Inquires**

The NIST Calibration Services website is intended to make the task of selecting and ordering an appropriate calibration service as quick and easy as possible. Nevertheless, when questions arise you should contact NIST for immediate clarification.

General inquiries about the NIST calibration services, assistance in determining the availability of services, and requests for complimentary copies of the Guide for the International System of Units (SP 811), and Guidelines for Evaluating and Expressing the Uncertainty of NIST Measurement Results (TN 1297) are to be addressed to:

PML Calibration Services  
National Institute of Standards and Technology  
100 Bureau Drive, Stop 8363  
Gaithersburg, MD 20899-8363  
United States of America  
Telephone: (301) 975-2200  
Fax: (301) 975-2950  
Email: [calibrations@nist.gov](mailto:calibrations@nist.gov)  
Internet: [www.nist.gov/calibrations/](http://www.nist.gov/calibrations/)

For technical questions concerning a specific service, directly contact the NIST staff member responsible for that calibration area.

## **M. Contracts and Signed Statements**

As an agency of the United States Federal Government, Department of Commerce, the National Institute of Standards and Technology attests solely to the provisions described above. Receipt of orders by NIST does not imply acceptance of any provisions set forth in the order that are contrary to the policy, practice, or regulations of NIST or the U.S. Government. In general, NIST will not sign any affidavits, acknowledgement forms, or other documents that may be required by any domestic or foreign entity for policy governing procurement of goods and services.

## **N. Use of NIST Instrumentation at a User's Facility**

The delivery of certain measurement services requires that NIST equipment be loaned to the customer for on-site measurements and/or calibrations. The customer agrees to be responsible for the equipment once it leaves NIST until it is returned to NIST's possession. The User will obtain appropriate liability insurance, including property damage insurance, and will be required to present evidence of insurance coverage for the equipment in an amount not less than \$100,000, or alternatively, not less than the amount specified by NIST in the documentation accompanying the equipment.

## **CHAPTER 2**

### **ORDERING INSTRUCTIONS FOR DOMESTIC CUSTOMERS**

#### **A. Customer Inquires**

General customer inquiries for information or clarifications about the NIST calibration services should be directed as follows:

PML Calibration Services  
National Institute of Standards and Technology  
100 Bureau Drive, Stop 8363  
Gaithersburg, MD 20899-8363  
301-975-2200 phone  
301-975-2950 fax  
[calibrations@nist.gov](mailto:calibrations@nist.gov)

#### **B. Prearrangements and Scheduling**

Services should be arranged in advance, beginning with direct contact with a NIST technical staff member responsible for the desired service. Use the appropriate technical section of the Users Guide or Fee Schedule to determine whom to contact. This advance communication may answer your questions, clarify the policies and procedures briefly described here, and will permit you to schedule a tentative calibration date. Following the initial communication, you must complete and submit a purchase order and prepare to ship the item according to the procedures described below or agreed upon with the technical contact. If a calibration is scheduled far in advance, the item should not be shipped until shortly before the scheduled date; you must submit the purchase order (complete with the name and number of the desired service) before a firm calibration date can be assigned. When NIST receives your purchase order and assigns a firm service date, your order will be confirmed by the technical contact.

#### **C. Purchase Orders**

Before you ship an item for calibration, send a purchase order to the address listed in the appropriate technical section. The purchase order must:

1. State both the name and number of the NIST service (listed in this Fee Schedule as the “Service ID Number”) being requested. **FAILURE TO INCLUDE THE SERVICE ORDER NUMBER WILL SERIOUSLY IMPEDE SCHEDULING AND SERVICE.**
2. Clearly identify the item(s) being sent for calibration, including any serial number(s) or model number(s).
3. Give the name, address, and telephone number of your company’s procurement officer, purchasing agent or other administrative/financial authority.
4. Give the name, address, and telephone number of your company’s technical contact, if different from above.
5. List separately the instructions and address for return shipment, insurance, mailing address for the calibration/test report, and billing address. (Federal or state agency requests for calibration services should be accompanied by a document authorizing that the cost of the service be billed to the agency).
6. Clearly state any special or necessary conditions of test, such as operating frequency or temperature.

7. Clearly state the customer identification number; i.e., customer's employer identification number (EIN) for individuals; tax identification number (TIN) for organizations; or agency location code (ALC) for government customers.
8. If the calibration or test report is to be handled in a special manner, give instructions on the purchase order.

**NOTE:** Receipt of orders by NIST does not imply acceptance of any provisions set forth in the order that are contrary to the policy, practice, or regulations of NIST or the U.S. Government. In general, NIST will not sign any affidavits, acknowledgement forms, or other documents that may be required by company policy governing the procurement of goods and services.

#### **D. Remit to**

Payment Terms: Net 30 days

No discounts are allowed for early payment.

#### **PAY.GOV**

For NIST invoices, electronic payments can be submitted through Pay.gov by ACH, VISA, MasterCard, Discover, American Express or debit card. Go to [www.pay.gov](http://www.pay.gov). Bypass the user id and password section; you do not need to be registered with Pay.gov to make a payment against our invoices. To locate the payment forms click on "by Agency Name" on the left hand side of the menu bar. Find and select the National Institute of Standards and Technology. Choose the appropriate NIST payment form that best fits your invoice. Complete all required fields and submit you payment.

**Note: For ACH payments, please verify with your banking institution that your account is set up to have ACH payments processed.**

#### **Remit to address:**

**NIST Lockbox** accepts check payments for NIST. Please use the following address for all NIST payments:

NIST  
P.O. Box 301505  
Los Angeles, CA 90030-1505

Please remember that all checks must be drawn on a United States bank and made payable in US dollars. In addition, please continue to reference the NIST invoice/receivable number on the check stub.

#### **Other Forms of Payment**

In addition to checks, NIST also accepts VISA, MasterCard, Discover, and American Express. Customers can supply their credit card information and fax a copy of the invoice to Accounts Receivable at 310/975-8943 or mail the information to:

NIST  
Mail Stop 1624  
100 Bureau Drive  
Gaithersburg, MD 20899-1624

**NIST Federal Identification Number: 530-20-5706**

**NIST DUNS Number:** 929956050

**W-9 Mail to:**

NIST  
Accounts Receivable  
Stop 1624  
Gathersburg, MD 20899-1624

## **E. Shipping, Insurance, and Risk of Loss**

Ship the instrument or standard to the mailing address of the technical group providing the service. Please take note that the mailing address is not the same for every technical group.

**Please adhere rigorously to the following procedures:**

1. Ship only items in good repair. Apparatus in disrepair will not be calibrated. If defects are found, after calibration has begun, the procedure will be terminated, a report issued, and a charge levied for work completed.
2. Use strong, reusable packing materials and containers marked clearly and indelibly on the outside with the requestor's name, address and the following notation: **REUSABLE CONTAINER, DO NOT DESTROY.**
3. Follow any special shipping procedures given in the technical sections of the Calibration Services Users Guide, particularly those sections covering radiation and dosimetry measurements.
4. Insure the shipments to and from NIST and clearly state the method of return shipment. NIST will not assume liability for loss or damage unless such loss and damage result solely from the negligence of NIST personnel. If return shipment by parcel post is requested or is suitable, NIST will prepay the return shipment but will not insure it. When no shipping or insurance instructions are furnished, NIST will return the shipment by common carrier, collect and uninsured.
5. Shipments to NIST must be at FOB destinations (customer pays for shipping).
6. Return shipments are sent FOB origin (customer pays for shipping).

**NOTE: Fees for NIST services do not include shipping cost or insurance.**

## **F. Turnaround Time**

Normal turnaround time for NIST calibration services varies greatly—usually from several weeks to several months depending on the type of service requested, and the service schedule. Some services are only scheduled once or twice a year with appointments made months in advance of the service date. To avoid unnecessary scheduling or administrative delays in the calibration process, always make arrangements with the technical contact for the service you wish to utilize prior to shipping your instrument or artifact to us.

## **G. Customer Checklist**

Please refer to last page of this chapter for a Customer Checklist which is intended to assist you in developing the basic information required to process an order for calibration services at NIST.

### **SPECIAL INSTRUCTIONS FOR FOREIGN CUSTOMERS**

#### **A. Foreign Inquires**

Foreign customers should address all inquiries to:

PML Calibration Services  
National Institute of Standards and Technology  
100 Bureau Drive, Stop 8363  
Gaithersburg, MD 20899-8363  
United States of America  
Telephone: (301) 975-2200  
Fax: (301) 975-2950  
Email: [calibrations@nist.gov](mailto:calibrations@nist.gov)  
Internet: [www.nist.gov/calibrations/](http://www.nist.gov/calibrations/)

**NOTE:** Please clearly indicate your **city** and **country** on all correspondence so that we may promptly respond to your request.

#### **B. Criteria for Providing Service**

Under certain circumstances, NIST is authorized to provide measurement service, including calibration services, for organizations or individuals located outside the United States. However, the Calibration Program must review each request for calibration services to determine if services are available to the requestor's organization in the requestor's country. Foreign customers must provide the following information, in writing, to the Calibration Program (see address above):

1. Identification of the item(s) to be calibrated, including serial and model numbers.
2. A detailed description of the measurements that are needed, or indicate the service identification number.
3. A description of any special requirement/circumstance that might affect the decision to provide the service. For example, will adjustments have to be made to the instrument, or will the time period be restricted in which the device is available for calibration?
4. A complete name and address of the requestor's organization.

#### **C. Special Instructions**

If the request for calibration service is accepted by NIST, the requesting organization will be notified of the cost of service and will be given the contact information for the NIST technical unit that will perform the measurements. The requesting organization must then complete the following steps:

1. Contact the NIST technical staff that will perform the service to determine the time schedule.
2. Send a purchase order to the Calibration Program. Provide complete addresses, including country, for returning the instrument and for mailing the calibration or test report.
3. NIST policy requires prepayment for all NIST calibration services requested by non-U.S. organizations. Before proceeding with any service(s), we will need a check, money order or a bank wire transfer. The prepayment must be for the full amount and be drawn on a U.S. bank. The prepayment methods are as follows:

### **Money Orders & Prepayment Checks**

All foreign checks must be drawn on a United States Bank and made payable in US Dollars. All foreign checks must be mailed to the Receivables officer for deposit. In addition, please reference the NIST invoice/receivable number on the check stub. Checks made payable to the National Institute of Standards and Technology (NIST) should be mailed to:

NIST  
Mail Stop 1624  
100 Bureau Drive  
Gaithersburg, MD 20899-1624

### **Prepayment by credit card**

Please contact NIST Accounts Receivable Office at 301-975-3880, by email: [billing@nist.gov](mailto:billing@nist.gov), or by Fax: 301-975-8943.

### **Bank Wire Transfers**

Payments may also be sent by wire using the US Department of Treasury FEDWIRE system and it can be done so to the following bank:

Treas NYC (Account is with the Federal Reserve Bank of New York)  
U.S. Dept. of Treasury  
33 Liberty Street  
New York, NY 10045  
Phone: 001-202-874-7132

In Payment Details field, CL329930001  
ABA# 021030004  
Account # 13060001  
Account Name: TREAS NYC/CTR/BNF=/NIST/AC-13060001

Reference "Calibrations" to enable us to identify your payment. In addition, please be sure to pay any fees assessed for your bank wire transfers; otherwise, they will deduct it from your prepayment wire.

**We cannot accept wire payment make through the Swift system only FEDWIRE. Therefore, we do not have a Swift code.**

**PLEASE NOTE:** Our account number and name are of critical importance and must be referenced in order for NIST to be properly credited with your payment. It must appear in the precise manner shown to allow for the automated processing and classification of the funds transfer message. In addition, please refer to the NIST invoice number, your purchase order number, your country, and any other pertinent information that would help us identify you payment.

The transfer of funds can only be accomplished by your company going through a U.S. correspondent bank or by having your country's central bank send a swift telecommunication system message to the Federal Reserve Bank. **Be sure to cover any processing fees your bank may charge you.** Questions on bank wiring can be directed to the NIST Accounts Receivable Office at 301-975-3880, email: [billing@nist.gov](mailto:billing@nist.gov), or fax at 301-975-8943.

## **D. Shipping Charges**

The calibration costs quoted *do not* include shipping, insurance, or the services of a customs broker. You must arrange and pay for these services separately. For your information, NIST currently uses the following customs brokers:

### **Gaithersburg, Maryland**

Laing International  
P.O. Box 16144  
Washington, DC 20041  
Phone: (703) 471-9279  
Fax: (703) 471-8436

### **Boulder, Colorado**

FedEx Trade Networks  
4725 Paris Street, Suite 200  
Denver, CO 80239  
Phone: (303) 371-9550  
Fax: (303) 373-0850

You are **not required** to use these customs brokers, but may select a broker of your choice.

Service ID Number	Description of Services	Fee (\$)
11010S	Special Tests of Cylindrical Diameter Standards (i.e. Plug and Pin Gages): Set Up Charge, per order	200
11011S	Mechanical comparison, per Gage (25 mm and smaller)	118
11012S	Interferometry, per Gage (50 mm and smaller)	271
11013S	Per Gage (over 50 mm)	At Cost
11014S	Roundness trace, per trace	222
11020C	Measuring Wires for Threads and Gears: Set Up Charge, per order	200
11021C	Single Wire, per wire	119
13020S	Special Tests of Roundness (Sphere and Hemisphere Types) Reversal Method: Radial Deviations from Best Fit Least-Squares Circle at 360 positions	1357
13030S	Special Tests of Roundness Calibration Specimens	At Cost
11030S	Special Tests of Spherical Diameter Standards; Balls: Set Up Charge, per order (applies to mechanical comparison and interferometry)	200
11031S	Mechanical Comparison (51 mm or smaller), Average Diameter, per ball, Expanded Uncertainty, $U \sim \pm 89$ nm to 115 nm	114
11032S	Mechanical Comparison (over 51 mm), Average Diameter, per ball	At Cost
11033S	Interferometry (25 mm or smaller) Average Diameter, per ball, Expanded Uncertainty, $U \sim \pm 30$ nm	579
11034S	Ball Out-of-Roundness: Least-Squares Out-of-Roundness and Polar Plots, price per trace (Typically three orthogonal traces for spheres and five traces for CMM calibration spheres) price per trace	110
<b>Special Tests of Internal Diameter Standards: Ring Gages</b>		
11040S	Plain Ring Gages, per ring	928
11050S	Special Tests of Diameter	At Cost

### IMPORTANT NOTES TO OUR CUSTOMERS:

1. Please contact the technical staff for correct Fee and appropriate Service ID Number for your equipment.
2. Please do not send purchase orders and equipment to NIST without scheduling a calibration.
3. Calibrations for variations of complete standard weight sets are available. These may require fewer (or more) than the number of measurement series required for the calibration of a complete standard weight set. These variations will affect pricing of the service. Contact the technical staff for details.
4. If you request a calibration estimate (which includes cost and turnaround time estimates and start date of calibration), please note that we need to receive a confirmation from you to reserve the calibration start date. If no confirmation is received within 30 days, the reservation will be cancelled and the start date given to the next customer.

**NOTE:** Due to the time and effort required preparing vacuum instrumentation for calibration it is particularly important that they be known to be in proper operating condition when they are submitted to NIST. Equipment will be inspected upon receipt and the customer notified of any obvious damage. If the schedule permits, we will cooperate with the customer's efforts to repair or replace damaged equipment so that the calibration of their equipment can proceed. However, concealed damage or operational deficiencies most likely will not be detected before the instrument is operating on the vacuum system or the calibration has started; in such cases, **if the equipment cannot be calibrated, we will charge 20 % of the regular calibration fee for low-pressure transducers and 30 % of the regular fee for spinning rotor and ionization gages.**

<b>E.1 Spectroradiometric Source Measurements</b>		
Service ID Number	Description of Services	Fee (\$)
<b>NIST calibrates and issues a type 30A/T24/13 tungsten strip lamp with a mogul bi-post base.</b>		
39010C	Spectral Radiance Standard, Tungsten Strip Lamp (225 nm to 2400 nm) (other spectral ranges are available under no. 39060S)	15950
<b>NIST calibrates customer supplied integrating sphere sources and maps the source aperture.</b>		
39020C	Spectral Radiance Standard, Integrating Sphere Source (300 nm to 1000 nm in 25 nm steps)	7634
39021C	Spectral Radiance Standard, Integrating Sphere Source (300 nm to 2400 nm in 25 nm steps)	11770
<b>NIST calibrates and issues an 1000 W, tungsten quartz-halogen lamp mounted in a medium bi-post base. The calibrations are performed at 50 cm.</b>		
39030C	Spectral Irradiance Standard, 1000 W Tungsten Quartz-Halogen Lamp (250 nm to 450 nm)	9638
39031C	Recalibration of 1000 W Tungsten Quartz-Halogen Lamp (250 nm to 450 nm)	5795
39032C	Spectral Irradiance Standard, 1000 W Tungsten Quartz-Halogen Lamp (350 nm to 800 nm)	9638
39033C	Recalibration of 1000 W Tungsten Quartz-Halogen Lamp (350 nm to 800 nm)	5795
39040C	Spectral Irradiance Standard, 1000 W Tungsten Quartz-Halogen Lamp (250 nm to 1600 nm)	11936
39041C	Recalibration of 1000 W Tungsten Quartz-Halogen Lamp (250 nm to 1600 nm)	8094
39045C	Spectral Irradiance Standard, 1000 W Tungsten Quartz-Halogen Lamp (250 nm to 2400 nm)	14670
39046C	Recalibration of 1000 W Tungsten Quartz-Halogen Lamp (250 nm to 2400 nm)	10850
<b>NIST calibrates and issues a 30 W deuterium arc lamp mounted in a medium bi-post base.</b>		
39050C	Spectral Irradiance Standard, 30W Deuterium Arc Lamp (200 nm to 400 nm)	13287
39051C	Recalibration of 30 W Deuterium Arc Lamp (200 nm to 400 nm)	9012
39060S	Special Tests of Radiometric Sources	At Cost
<b>E.2 Spectroradiometric Detector Measurements</b>		
39071C	UV Silicon Photodiodes	1615
39072C	Recalibration of UV Silicon Photodiodes	1398
39073C	Visible to NIR Silicon Photodiodes	4600
39074C	Recalibration of Visible to NIR Silicon Photodiodes	3046
39075S	Special Tests of NIR Photodiodes	At Cost

39077C	UV to Near-Infrared Silicon Photodiodes (Hamamatsu S2281)	5460
39078C	Recalibration of UV to Near-Infrared Silicon Photodiodes (Hamamatsu S1337–1010BQ or S2281)	3810
39080S	Special Tests of Radiometric Detectors	At Cost
39081S	Special Tests of Photodetector Responsivity Spatial Uniformity	At Cost
39090S	Special Tests of IR Detectors	At Cost
39100S	Special Tests of Irradiance Detectors	At Cost
39200S	Special Tests of Aperture Area	At Cost

Calibration fees are the most critical element in funding the metrology services that we provide, and represent the direct cost of providing calibration services for dc resistors and shunts. These services often reach beyond traceability to include detailed consultation. Currently our fees also must recover some of the rapidly increasing costs of providing year-round, readily accessible services and maintaining state-of-the-art traceability through the quantum Hall effect standard. Customers of our most critical calibration services, NIST Service ID numbers 51130C and 51131C, have benefited the most from our efforts to reduce turn-around time through automation, and to provide the world's best level of uncertainty, while keeping these test fees at a reasonable level.

Service ID Number	Description of Services	Fee (\$)
52100S	Special Four Terminal-Pair (4TP) Capacitance and Dissipation Factor Characterization	At Cost
52110S	Special LF Capacitance Measurements, by Prearrangements	At Cost
52120S	Special Measurement Assurance Program for Standard Capacitors (100 pF and 1000 pF, at a Frequency of 1000 Hz)	At Cost
52130C	Fixed, Fused-Silica Dielectric Standard Capacitors (1, 10, and 100) pF, at a Frequency of (100, 400, or 1000) Hz	4216
52131C	Additional Measurement at One of the Above Frequencies	442
52140C	Fixed Three-Terminal, High-Precision Nitrogen Dielectric Standard Capacitors with Coaxial Connectors, Small Uncertainty, (10, 100 and 1000) pF, at a Frequency of (100, 400, or 1000) Hz	2769
52141C	Additional Measurement at One of the Above Frequencies	393
52150C	Physical Tests for Three-Terminal Standard Capacitors with Coaxial Connectors, Large Uncertainty (0.001 pF to 10 000 pF) at a Frequency of (100, 400, or 1000) Hz	2553
52160C	Fixed Three-Terminal Standard Capacitors with Coaxial Connectors, Large Uncertainty (0.001 pF to 10 000 pF) at a Frequency of (100, 400, or 1000) Hz	1754
52161C	Additional Measurement at One of the Above Frequencies	393
52170C	Two- or Three- Terminal Mica Dielectric Standard Capacitors with Binding Post Connectors (0.001 $\mu$ F to 1 $\mu$ F), at a Frequency of (66, 100, 400, 1000 or 10 000) Hz	3009
52171C	Additional Measurement at One of the Above Frequencies	2471
52176C	Two-Terminal Standard Capacitors with Precision High Frequency (HF) Coaxial Connectors (0.001 pF to 10 000 pF), at a Frequency of 1000 Hz	At Cost
52180C	Fixed Standard Inductors (0.00005 H to 10 H), at a Frequency of (100, 400, 1000, or 10 000) Hz	1801
52181C	Additional Measurement at One of the Above Frequencies	1601

52190S	Special LF Inductance Measurements, by Prearrangement	At Cost

## **CHAPTER 11**

### **SEMINARS**

The following announcements concern notification of changes in services and information about future NIST Measurement Seminars. General policy questions regarding NIST measurement services should be referred to the Calibration Program.

#### **NIST MEASUREMENT SEMINARS**

NIST holds seminars and workshops that provide advice and assistance on measurements and calibrations. This affords laboratories outside NIST an opportunity to learn how to make measurements consistent with national standards which NIST maintains. Participation is open to a limited number of people who have the appropriate education, work experience, and current profession in measurement and standards laboratory activities.

Each seminar lasts from one to five days and is devoted to lectures, group discussions, and laboratory demonstrations. A course may be cancelled if registration is insufficient. However, in the past, requests for enrollment have nearly always exceeded the numbers that could be accommodated.

Acceptance letters will be mailed no later than 4 weeks prior to the scheduled date of the course. Detailed information on schedules and housing will be included. Those accepted will be expected to study the assigned reading material before coming to the course and should be prepared to discuss their own experiences with related problems.

See the Weights and Measures Program web site [www.nist.gov/pml/wmd/index.cfm](http://www.nist.gov/pml/wmd/index.cfm) for the National Conference on Weights and Measures (NCWM) Calendar of Events for other training not listed here.

NIST offers conferences and workshops throughout the year. To see the latest listing go to [www.nist.gov](http://www.nist.gov) for upcoming NIST Conferences and Events.
