

DISASTER RESILIENCE WORK PLAN AND FRAMEWORK

Table of Contents

Executive Summary	1
1. Introduction.....	2
1.1. Authority	2
1.2. NIST Plan.....	2
1.2.1. Disaster Resilience Framework	3
1.2.2. Model Resilience Guidelines	3
1.2.3. Regional Workshops.....	4
1.2.4. Disaster Resilience Standards Panel	4
1.3. Key Elements in Disaster Resilience Framework.....	4
1.4. Standards Identified for Implementation	4
1.5. Needs for Standard Development	5
1.6. Alignment with Other Disaster Resilience Programs	5
2. Community Disaster Resilience for the Built Environment	6
2.1. Community Level Disaster Risks	6
2.1.1. Community Disaster Resilience for the Built Environment	6
2.1.2. Hazard Events and Potential Impacts	7
2.1.3. Diversity of Communities.....	8
2.1.4. Community Vulnerabilities and Consequences of Failure and Disruption	8
2.2. Pathway to Community Resilience.....	9
2.2.1. Performance Goals, Values and Objectives.....	9
2.2.2. Acceptable Risks.....	9
2.2.3. Non-Construction Strategies.....	9
2.2.4. Construction Related Strategies	9
3. Examples of Community Disaster Resilience	10
3.1. Introduction.....	10
3.2. Past Performance of Communities and Their Critical Buildings and Infrastructure Systems	10
3.2.1. 2005 Hurricanes Katrina and Rita.....	10
3.2.2. 2012 Hurricane Sandy.....	10
3.2.3. 2011 Joplin Tornado	10
3.2.4. 2013 Colorado Flooding	10
3.2.5. 1994 Northridge Earthquake.....	10
3.2.6. 2010 Chile Earthquake.....	10
3.2.7. 2011 New Zealand Earthquake	10
3.2.8. 2013 Japan Tsunami	10
3.2.9. 2007 Southern California Wildland-Urban Interface Fires	11
3.2.10. 2012 Colorado Wildland-Urban Interface Fires	11

3.3. Current Performance and Common Problems	11
3.4. Identification of gaps and challenges for disaster resilience standards development and harmonization	11
4. Sectors, Interdependencies and Cascading Effects.....	12
4.1. Sectors to be Considered.....	12
4.2. Interdependencies of Sectors	12
4.3. Buildings and Transportation.....	12
4.4. Buildings and Lifelines for Functionality	12
4.5. Transportation and Lifelines for Functionality	12
4.6. Energy and Other Lifelines	12
4.7. Cascading Effects.....	12
4.8. Sequential Recovery from Disasters by Sector.....	13
4.8.1. Critical Buildings	13
4.8.2. General Recovery Sequence	13
5. Building Sector	14
5.1. Introduction.....	14
5.2. Importance of Building Stock Data	14
5.3. Performance Goals for Buildings.....	15
5.4. Government.....	15
5.5. Business and Services	15
5.6. Industry	15
5.7. Residential.....	15
5.8. Existing Buildings.....	16
5.9. New Construction	16
5.10. Resilience Gaps.....	16
5.10.1. Standards and Codes	16
5.10.2. Practice gaps and research needs	16
5.11. Summary and Recommendations	16
6. Transportation Sector	17
6.1. Introduction.....	17
6.2. Performance Goals for Transportation.....	17
6.3. Assessing Critical Transportation Infrastructure	18
6.3.1. Roads, bridges, highways	19
6.3.2. Rail (including subway systems)	19
6.3.3. Air	19

6.3.4. Ports, harbors and waterways	19
6.4. Resilience Gaps.....	19
6.4.1. Standards and Codes	19
6.4.2. Practice gaps and research needs	19
6.5. Summary and Recommendations	19
7. Energy Sector	20
7.1. Introduction.....	20
7.2. Performance Goals.....	20
7.3. Critical Energy Infrastructure	20
7.3.1. Electric Power	21
7.3.2. Liquid Fuel.....	21
7.3.3. Natural Gas	21
7.3.4. Emergency Power	21
7.4. Resilience Gaps.....	21
7.4.1. Standards and Codes	21
7.4.2. Practice Gaps and Research Needs	21
7.5. Summary and Recommendations	21
8. Communication and Information Sector	22
8.1. Introduction.....	22
8.2. Performance Goals.....	22
8.3. Critical Communication and Information Infrastructure	22
8.3.1. Landline Telephone Systems	22
8.3.2. Internet Systems.....	22
8.3.3. Cellular/Mobile Systems.....	22
8.4. Resilience Gaps.....	22
8.4.1. Standards and Codes	22
8.4.2. Practice Gaps and Research Needs	22
8.5. Summary and Recommendations	22
9. Water and Wastewater Sector	23
9.1. Introduction.....	23
9.2. Performance Goals.....	23
9.3. Critical Water Infrastructure	23
9.3.1. Water Systems	23
9.3.2. Wastewater Systems	23
9.3.3. Combined Storm and Sewer Lines	23
9.4. Resilience Gaps.....	23
9.4.1. Standards and Codes	23
9.4.2. Practice Gaps and Research Needs	23

9.5. Summary and Recommendations	23
10. Tools and Metrics for Evaluating Disaster Resilience.....	24
10.1. Community Resilience Metrics.....	24
10.2. Prioritization of resilience alternatives	24
10.3. Risk management approach for evaluating resilience alternatives	24
11. Recommendations and Next Steps	25
11.1. Standards Identified for Implementation	25
11.2. Priority Action Plans for Standard Development	25
11.3. Research Needs	25
