Interoperability Voting Public Work Group

Jeramy Gray, CIO, LA County

John Wack, NIST

Chair and NIST Lead

- Jeramy Gray, Chair
  - CIO, LA County Office of Clerk/Registrar

- John Wack, NIST lead
  - IEEE Voting System Standards Committee

Interoperability Voting Public Work Group
Goal

"Develop a set election data standards using common interoperable technologies, which may inform and be incorporated into future versions of the Voluntary Voting System Guidelines (VVSG)."

Interoperability Voting Public Working Group
Approach

- Will leverage work started by the IEEE VSSC

- Will develop a complete set of election data UML models and associated standards in XML/JSON

- Greatly dependent on other PWG that will steer interoperability concepts

Interoperability Voting Public Working Group
Approach (cont'd.)

- PWG divided into sub-groups, review work products, liaison to other groups
- Examples of related efforts:
    - Election Results Reporting
    - Election Event Logging
    - Election Process Modeling
    - Online Voter Registration
    - Electronic Pollbooks
    - Voting Methods/Models

Interoperability Voting Public Working Group
Governance

- Leadership

- ***Scope!***

- Membership accountability

- Liaisons & Sub-groups

- Meeting Frequency

- Product delivery

Interoperability Voting Public Working Group
Next steps

- Gain clarity from this TGDC meeting on key aspects such as scope

- Establish initial roadmap

- Establish subgroups for current and new efforts with basic governance structure
