Subject: Exciting Anticipation for the Announcement of CSF 2.0 and Upcoming Online Tool
Date: Friday, November 3, 2023 9:06:01 AM

Dear Sir/Madam,

As a project manager focusing on cybersecurity, I am really excited about the release of the NIST CSF 2.0. The framework's updates, clarity, flexibility and global applicability make it a valuable resource for every organization. I would encourage business entities to consider adopting CSF 2.0 for enhanced cybersecurity practices.

In addition, I am also looking forward to see the online tool of CSF 2.0 on NIST website. The human- and machine-readable formats would definitely provide much more convenience. Adopting CSF 2.0 would make Taiwan become more resilient to the cyber attacks.

In future, I would suggest customers adopt CSF 2.0 on their 5G private network (PN). Thank you so much for releasing CSF 2.0.

Best regards,

Victor Lin
Project Manager,
Auray OTIC and Security Lab.
