Subject: Cybersecurity Framework Comment
To: "cyberframework@nist.gov" <cyberframework@nist.gov>

I have reviewed most all of the material I found online regarding the innovative approach to Cyber Security Framework. It is all good but what I did not see, which is important to the work I am doing is how the proposed frame work integrates with the FEAF 2013 V2 and is there a use case or consideration as to how the framework can be transformed into a Enterprise Architecture repository tool for decision analysis.
