

# Please Note...

**This webinar and the engagement tools will be recorded.**

An archive will be available on the [event website](#).

# FEDERAL CYBERSECURITY WORKFORCE WEBINAR

The background of the slide is a photograph of the United States Capitol building in Washington, D.C. The building is a large, white, neoclassical structure with a prominent central dome. The sky is blue with scattered white clouds. The image is slightly faded to allow the text to be clearly visible.

Providing Timely and Clear Data to Support Federal  
Cybersecurity Workforce Needs

# FEDERAL CYBERSECURITY WORKFORCE WEBINAR

Welcome and Overview

Suzanne Nielsen

*Office of the National Cyber Director*

# FEDERAL CYBERSECURITY WORKFORCE WEBINAR

## Cyber Workforce Dashboard

Sarah Brickner

Program Analyst (Data Scientist)

*U.S. Office of Personnel Management*

# Cyber Workforce Dashboard

- Under development – due to sensitivity of data, OPM is deliberating which data can be released to the public; no release date set
- Dummy data used for this demonstration
- EHRI-SDM data
  - EHRI-SDM data comes from Federal Agencies' Human Resource Systems
  - Onboard data (all employees at single point in time at end of FY): 3-5 months delay
  - Dynamic data (hiring and separation actions throughout FY): 6-7 months delay
- Data is presented as percentages; Visuals with 10 or less people are withheld
- Excludes data at the Department/Agency/Sub-Agency levels

# FEDERAL CYBERSECURITY WORKFORCE WEBINAR

The background of the slide is a photograph of the United States Capitol building in Washington, D.C. The building is a large, white, neoclassical structure with a prominent central dome. The sky is blue with scattered white clouds. The text is overlaid on the top half of the image.

Lightcast.io

The Cybersecurity Talent Pipeline  
**is Broken**

# You Can't Prepare Workers for Jobs You Know Nothing About

Overcoming Data Shortfalls to Quantify the Full Cybersecurity Ecosystem

## The Problem

- 1 Historically, labor market information only tracked limited cybersecurity roles
- 2 Cybersecurity jobs evolve rapidly, but most workforce data come with a lag
- 3 No common language for describing cybersecurity jobs, skills, etc.

## The Solution

- 1 Leverage real-time job posting and social profile data
- 2 Define cybersecurity workforce in terms of job titles, skills, and credentials required
- 3 Map cybersecurity jobs to NICE Framework to create common language

# Tracking the Workforce of Today and Tomorrow

Lightcast Collects Workforce Data from Thousands of Sources Around the Globe

## Talent Pool Estimates

Government collected data providing structured job counts to benchmark with.

## Skills

Dig beneath vague and unreliable job titles to find the specific skills you need.

## Locations

Compare over 1,500 markets globally for talent supply with a singular taxonomy.

## Job Postings

See real-time trends on postings in almost 750 markets around the world.

## Companies

See top companies who are hiring or currently employing the talent you need.

## Profiles

See beyond government data to analyze over 350 million aggregated resumes to see deep insights.

Career Pathway

# What Do the Latest Data Tell Us About the Cybersecurity Workforce?

Despite Economic  
Uncertainty,

# Cybersecurity Job Demand Remains Strong

Over  
**755,743 cyber job openings**  
in the U.S. last year

**Over 1.1 million**  
existing cybersecurity workers

# But Supply Can't Keep Up with Demand

Cybersecurity Worker Supply  
and Demand Ratio

Cybersecurity jobs take  
**21% longer to fill**  
than other IT jobs

Cybersecurity jobs pay  
**10% higher salaries**  
than other IT jobs

# What is Unique About Federal Cybersecurity Workforce Challenges?

# Federal Cybersecurity Hiring is Fragmented

Cybersecurity jobs are  
posted by

**165**

**different federal  
entities**

# Public Cyber Demand is More Concentrated in Work Roles Related to Operate & Maintain, Collect & Operate, and Investigate

Public vs. Private Demand Across NICE Cybersecurity Framework

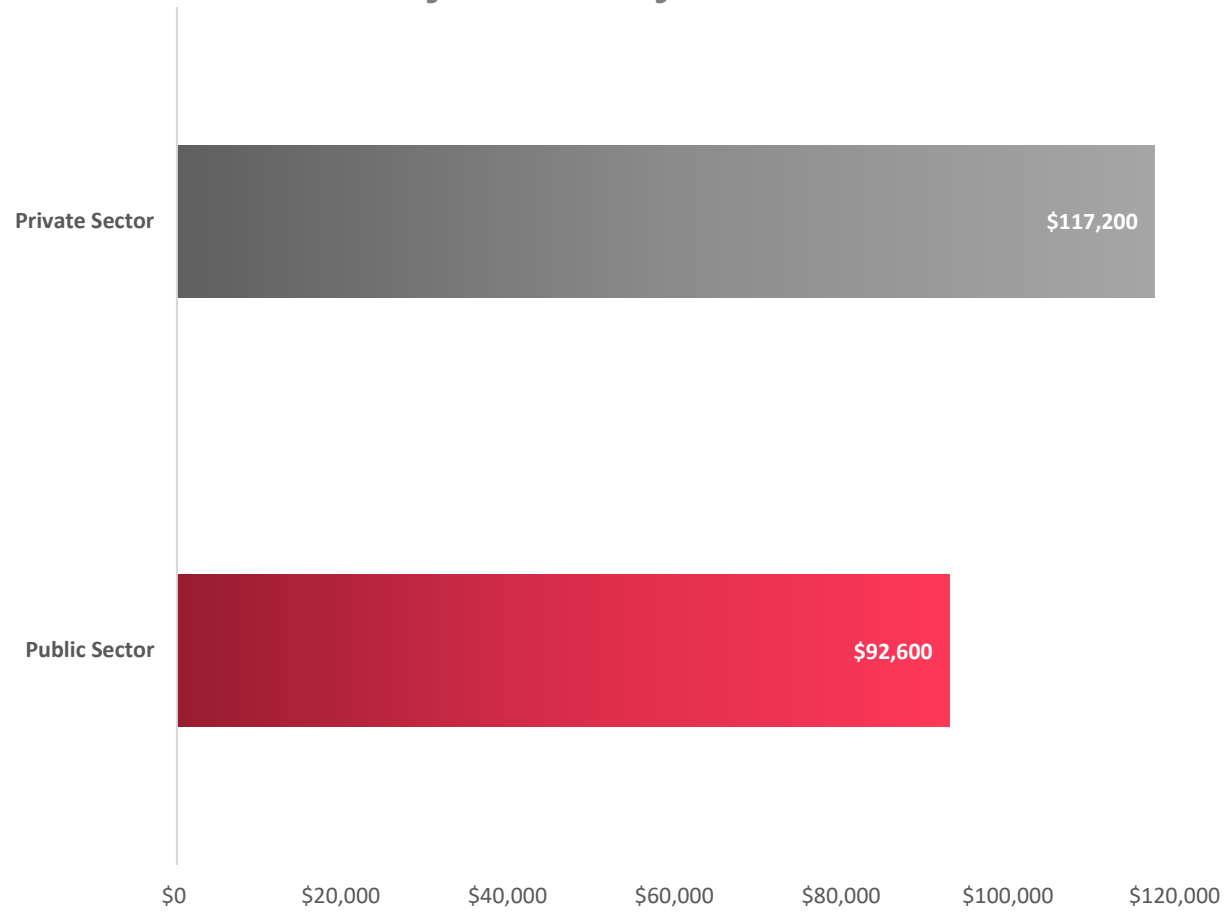

**Note:** One job may perform duties related multiple work roles, so the numbers will add to greater than 100%

# Public Sector Cyber Jobs Struggle to Keep Up with Private Sector Pay...

## Average Advertised Salary for Core Cybersecurity Jobs

# ...But Offer More Entry-Level Opportunities

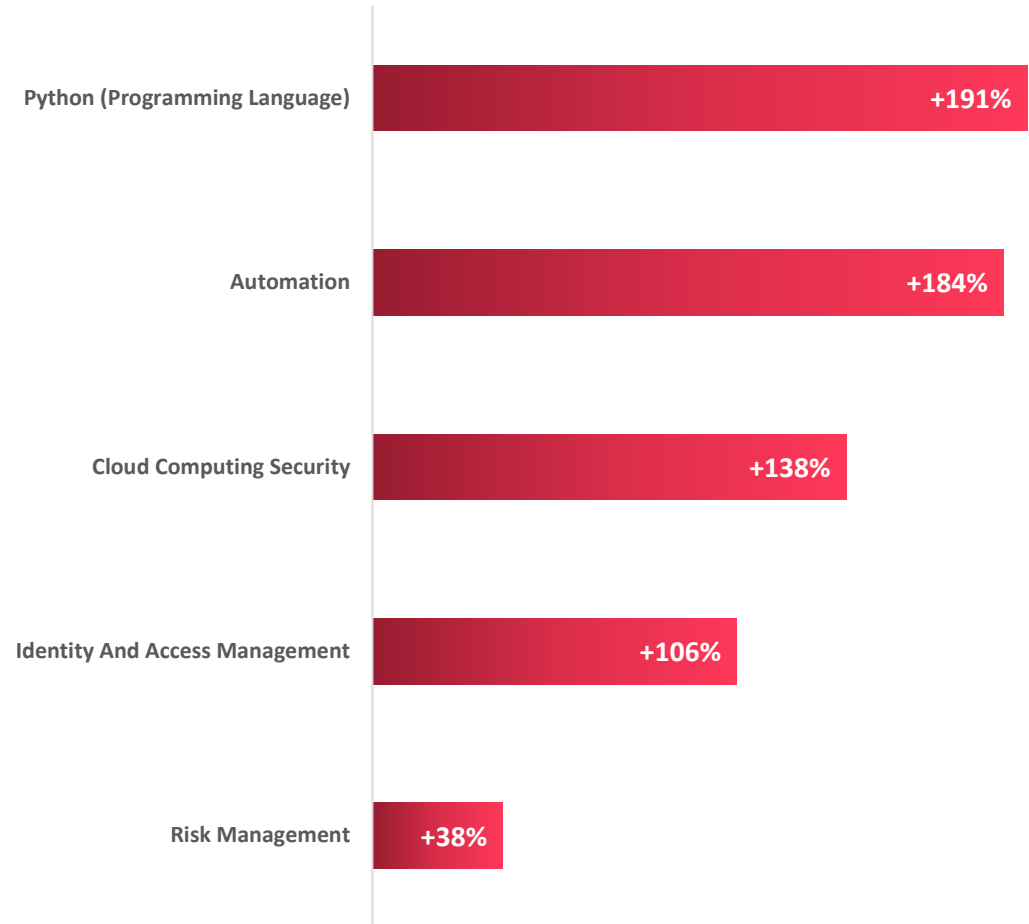

## Entry-Level Cybersecurity Opportunities

Private Employers Are 87%  
More Likely to  
**Emphasize  
Emerging High-  
Value Skills**

Sample Cyber Skills More Commonly Requested by  
Private Employers Than Public Employers

# Questions? Are There Other Challenges Federal Employers Face?

# How Can the Federal Government Address its Cybersecurity Hiring Challenges?

Focus on Building the Talent Pipeline for In-Demand Work Roles

## Demand by Work Role: Public Sector

↑ [NICE - Operate & Maintain](#)

**Systems Security Analyst**  
is the most-demanded work role among public employers

Notes: The NICE Workforce Categories are not mutually exclusive- one job could perform multiple roles within the framework. The data shown here are not intended to be aggregated.

# Train for High-Value Skills

Arm Students with the Skills Employers Most Value...Not Just Degrees

Skill	5-Year Projected Growth	Postings Oct. 2019-Sept. 2020	Salary Premium
Application Development Security	164%	29,635	\$12,266
Cloud Security	115%	19,477	\$15,025
Risk Management	60%	57,967	\$13,379
Threat Intelligence	41%	60,039	\$9,609
Incident Response	37%	23,497	\$5,683
Compliance and Controls	36%	54,770	\$12,423
Data Privacy and Security	36%	88,527	\$5,256
Access Management	32%	118,096	\$6,451
Security Strategy and Governance	20%	82,952	\$7,735
Health Information Security	20%	413,687	\$738

Many emerging cybersecurity skills

**boost salaries by \$10k-\$15k+**

# Right-Size Job Requirements

Focus on Need-To-Haves Versus Nice-To-Haves

## Sample Cybersecurity Job Requirements

### IT Security Analyst

#### Qualifications

- ~~2+ years of progressively increasing responsibility in the areas of~~ information security, cloud security, or cybersecurity
- Bachelor's degree in IT, cybersecurity or related area of study,
- ~~Prior cloud (AWS) experience~~
- Strong understanding of ~~restful API development, SDLC processes, and security automation desired~~
- Experience with multiple ~~environments and operating systems, devices and databases including Windows Server, Active Directory, VMWare, Azure, AWS.~~
- Strong analytical and problem solving skills
- Strong Incident Response background is preferred
- Fundamental understanding of security related technologies such as SIEM and SOAR
- Must have/obtain and maintain one or more Cloud or Security certifications such as AWS, Azure, CISSP, CISA, CISM, CIPT, SSCP, CCSP
- Strong understanding of information security standards, concepts, controls, testing ~~techniques and technical risk assessment~~

Removing a BA requirement  
**Saves \$16,000 and grows entry-level candidate pool by 61%**

Building, not buying, emerging cybersecurity skills

**Saves \$10,000+ for each emerging skill**

Eliminating specific certification requirements  
**Drops average salary costs by \$9,000**

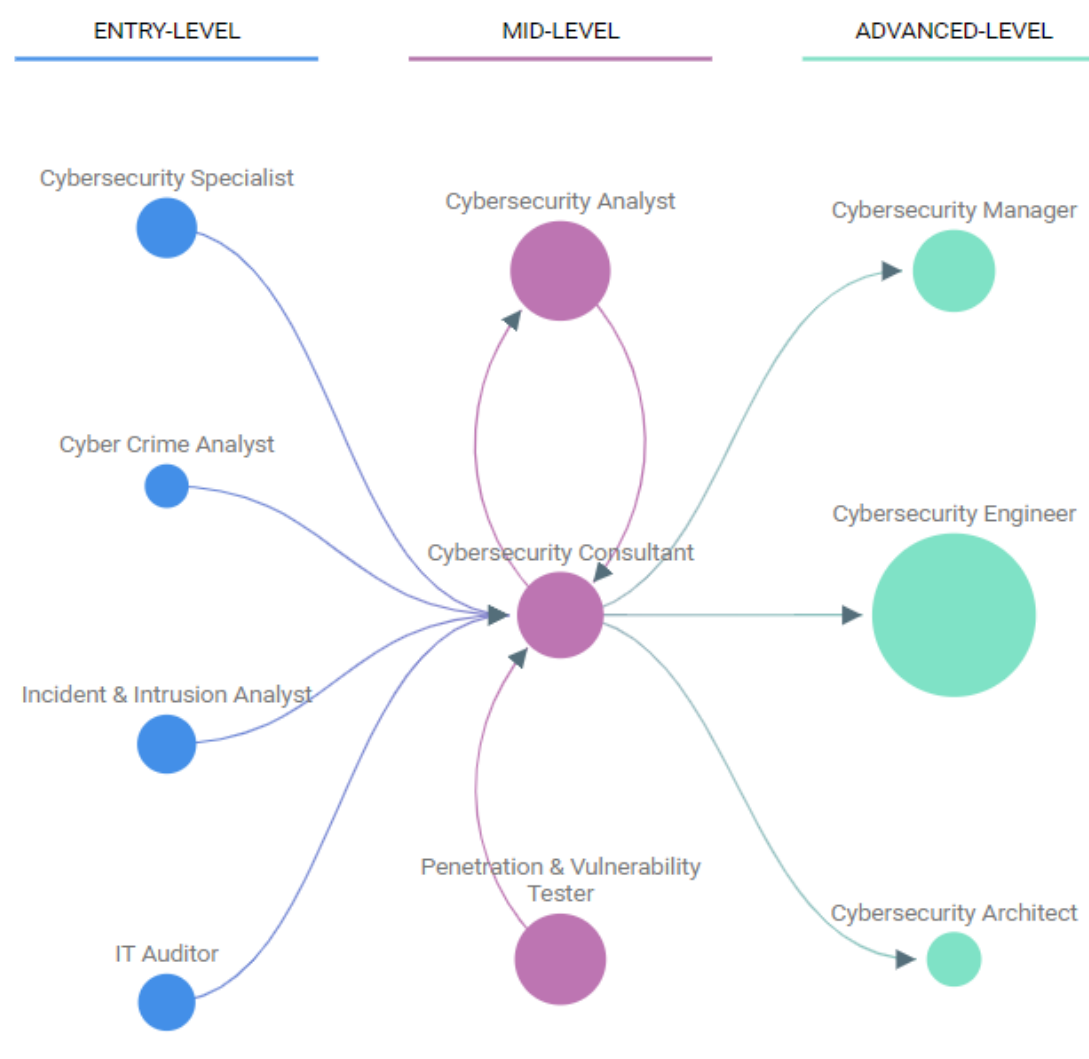

# Unlock the Power of Pathways

Build Diverse Talent Pipelines with Cybersecurity Career Pathways

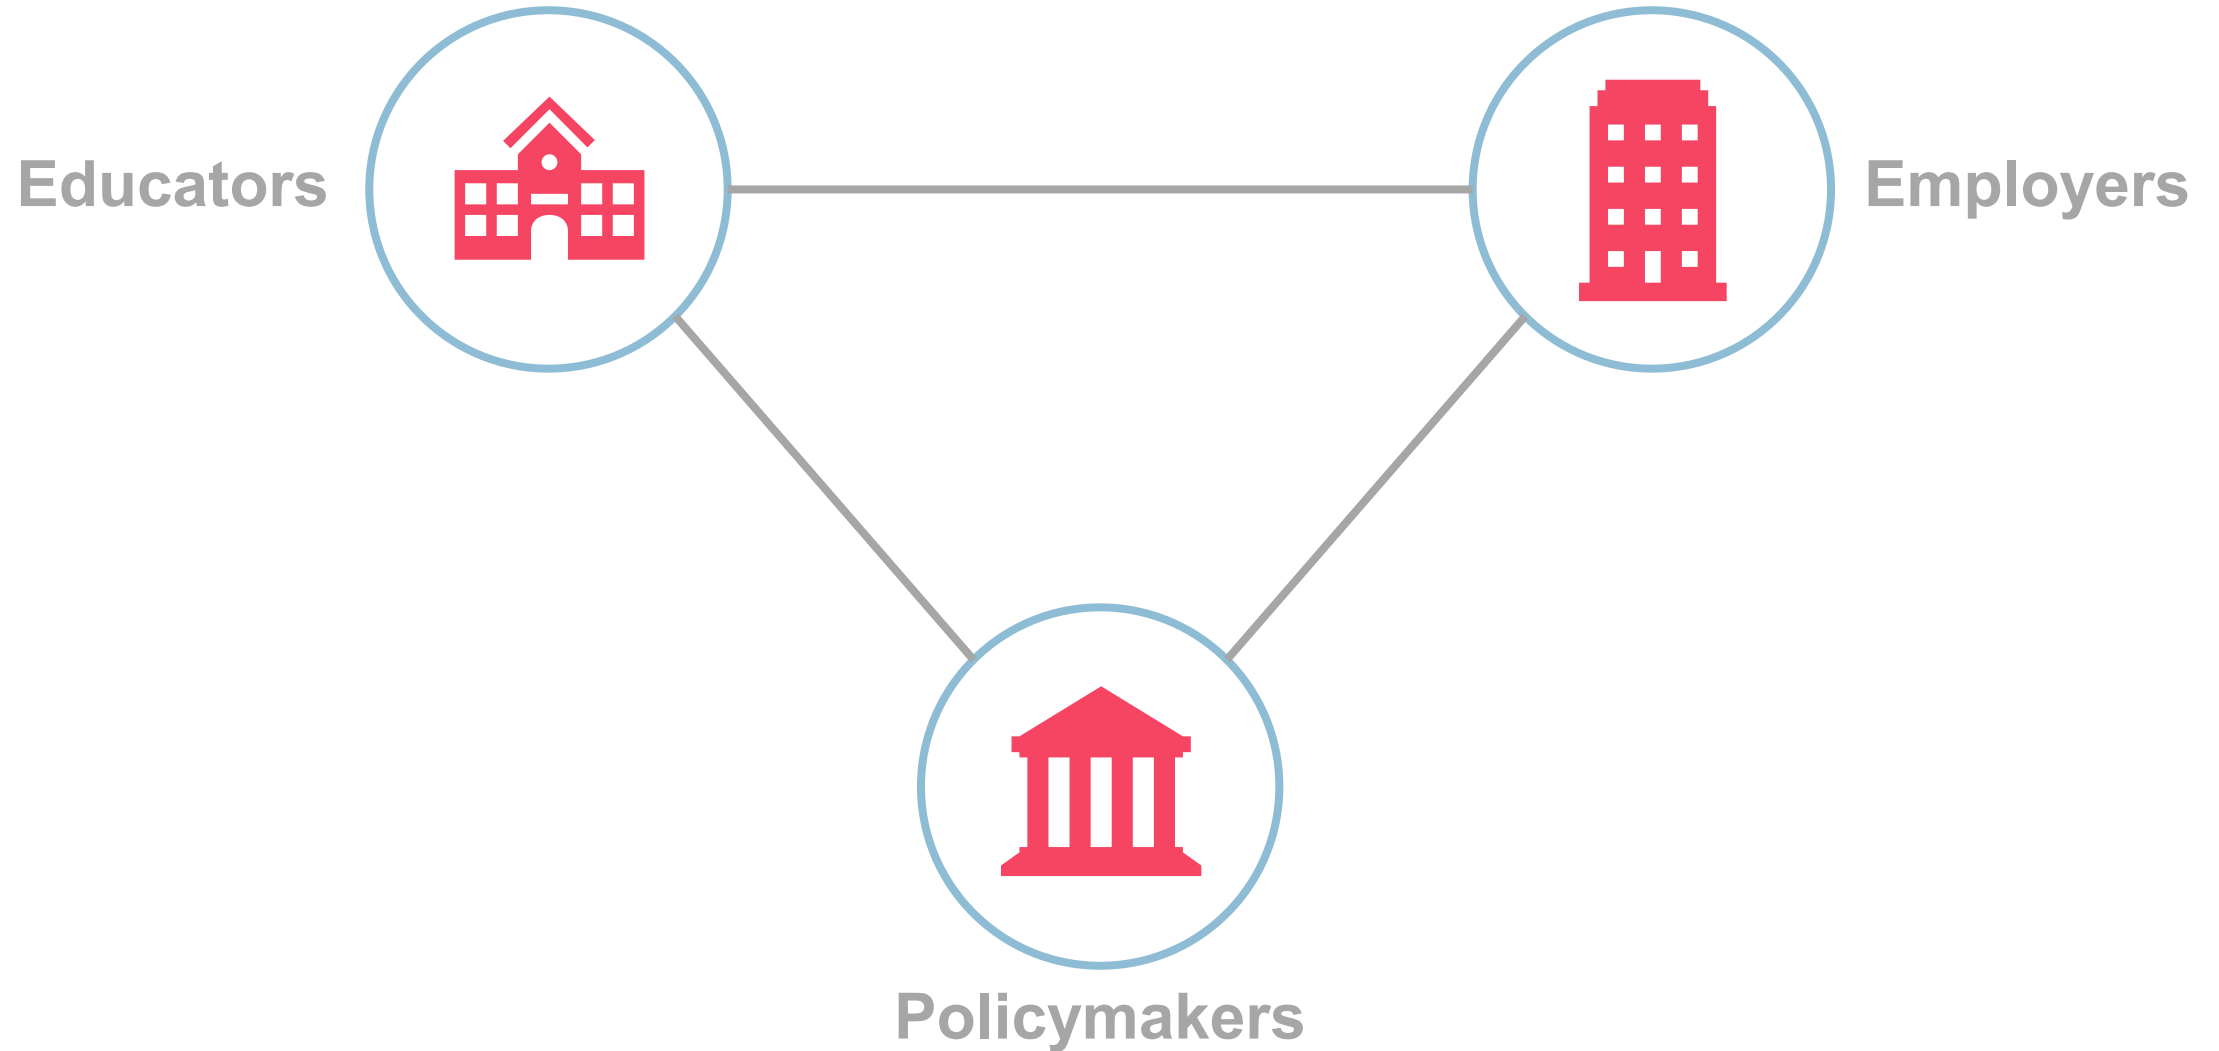

Building career pathways between skill-adjacent roles helps you:

- ✓ *Expand your talent pipeline*
- ✓ *Increase retention and employee engagement*
- ✓ *Reduce onboarding time*
- ✓ *Access more diverse pools of workers*

# Find Others With Skin in the Game

Partner with Local Employers, Policymakers, and Training Providers to Build the Next Generation of Cybersecurity Workers

# How Do We Make CyberSeek Even More Actionable for Federal Cybersecurity Employers?

## Planned Enhancements to CyberSeek

- 1 Separate federal data from state and local governments in the tool
- 2 Include time series data to track historical cybersecurity demand, add breakouts by education and experience levels, and increase the number of certifications and training providers tracked in the tool
- 3 Provide sample job descriptions and other tools that help employers shift to skills-based hiring
