

NIST Visiting Committee on Advanced Technology (VCAT)

Dr. Laurie Locascio
Under Secretary of Commerce
for Standards and Technology
and Director of NIST

February 14, 2024

- Session I:** Programmatic Updates: NIST Director's Overview and Safety
- Session II:** Programmatic and Operational Updates: DEIA and CHIPS R&D
- Session III:** Subcommittee on US International Standards Development Activity
- Session IV:** Working Session

NIST Leadership Changes

Mr. George Fischer

Senior Vice President
T-Mobile for Business and
Head of Business Sales

Refined VCAT Expectations

- **VCAT members are expected and strongly encouraged to attend all three scheduled meetings each year**
 - Piloting two single-day virtual meetings, one two-day, in-person meeting each year
 - Dates of upcoming meetings through 2026 on the VCAT website
- **VCAT members, NIST senior leadership, and guest presenters are expected to engage in active discussion** so that NIST can receive advice and guidance to continue to meet our mission

I. NIST Programmatic Updates

Updates

Artificial Intelligence

CHIPS PMT Announcements

Selected NIST Highlights

The President's Executive Order (E.O.) on Safe, Secure, and Trustworthy Artificial Intelligence (14110) directs NIST to:

Create Guidance

- Generative AI and dual-use foundation models
- Differential-privacy guarantee protections
- Red-teaming/testing
- Authenticity and provenance of synthetic content

Develop Evaluation & Testing

- Test environments for evaluating AI capabilities, including those that could cause harm
- Availability of testbeds supporting the development of safe, secure, and trustworthy AI technologies

Engage with Stakeholders & Develop Standards

- Global engagement on AI standards
- Synthetic nucleic acid synthesis providers engagement
- Minimum risk-management practices

NIST's Progress on E.O. Assignments **NIST**

Request for Information (RFI) to inform NIST's assignments

Draft Guidelines for Evaluating Differential Privacy

Secure Software Development Framework Workshop

Pre-release testing of NIST's Dioptra infrastructure

The USAISI's primary mission is to build the science necessary for safe development and use of trustworthy AI.

Research

Implementation

Engagement &
Operations

November 2023: Release of Federal Register Notice (FRN) asking for letters of interest– over 600 received!

February 2024: Official launch of Consortium with inaugural cohort of more than 200 member companies

February 2024: Begin working partners in five working groups

Adversarial Machine Learning Taxonomy and Terminology Report

- Identifies vulnerabilities of machine learning and AI
- Establishes common language for understanding threats and mitigation methods

NATIONAL AI ADVISORY COMMITTEE

NAIAC

- 4 Public Meetings
- 4 recommendation reports
- 2 non-decisional documents

What's Next for NIST?

AI E.O. Deliverables

- Report on synthetic content
- Guidelines for red-teaming
- Generative AI companion resource
- Pilot program for test evaluations

USAISI

- Develop Consortium work plans
- Nationwide workshops in support of working group activities

Updates

Artificial Intelligence

CHIPS PMT Announcements

Selected NIST Highlights

- **Preliminary memorandum of terms (PMT) reached with BAE Systems Electronic Systems**
 - \$35 million in federal incentives
 - Support modernization of Microelectronics Center in Nashua, NH
 - Quadruples the production of chips necessary for critical defense programs including the F-35 fighter jet program

CHIPS PMTs

- **Preliminary memorandum of terms (PMT) reached with Microchip Technology Inc.**
 - \$162 million in federal incentives
 - Modernize and expand facilities in Colorado Springs, CO, and Gresham, OR
 - Significantly increases U.S. production of semiconductors critical to America's automotive, commercial, industrial, defense, and aerospace industries

Updates

Artificial Intelligence

CHIPS PMT Announcements

Selected NIST Highlights

Creating Trust in Digital Technologies **NIST**

Coming Soon in 2024

- Cybersecurity Framework 2.0 release
- Post-Quantum Cryptography Standards

Recent Highlights

- MEP and MxD Collaboration
- Cybersecurity Profile for Consumer Grade Routers December Forum

NIST CYBERSECURITY FOR IOT PROGRAM

Advanced Communications

NIST

National Spectrum Strategy

Administrative

NOVEMBER 13, 2023

Memorandum on Modernizing United States Spectrum Policy and Establishing a National Spectrum Strategy

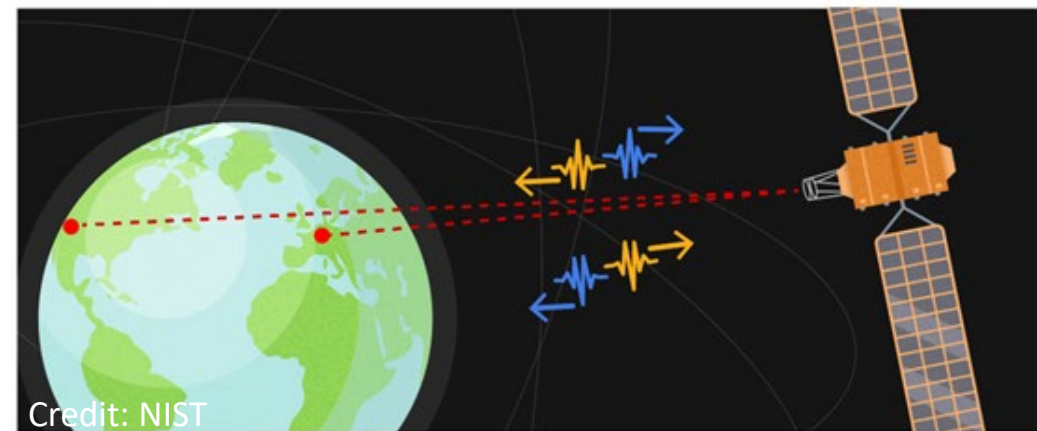

Next G Wireless Gaps Report

Communications Research and
Development Gaps Report

2023

Time Transfer

Precision timing at the quantum limit

Biotechnology

- DOC Ron Brown Award
 - For Serial Cytometry
 - Greg Cooksey
 - Mathew DiSalvo
 - Anthony Kearsley
 - Paul Patrone
- NIST-FDA workshop
 - Measurements and Standards for Advanced Therapy

NIST's multidisciplinary research continues to address climate change in impactful ways

Tornado-resistant design provisions incorporated into the 2024 International Building Code

Major Reports Released

- Report to Congress on PFAS in Firefighter Gear
- National Emerging Contaminants Research Initiative (NECRI) Implementation Plan
 - Drinking water contamination

National Emerging Contaminants Research Initiative
Implementation Plan

Reactor Status

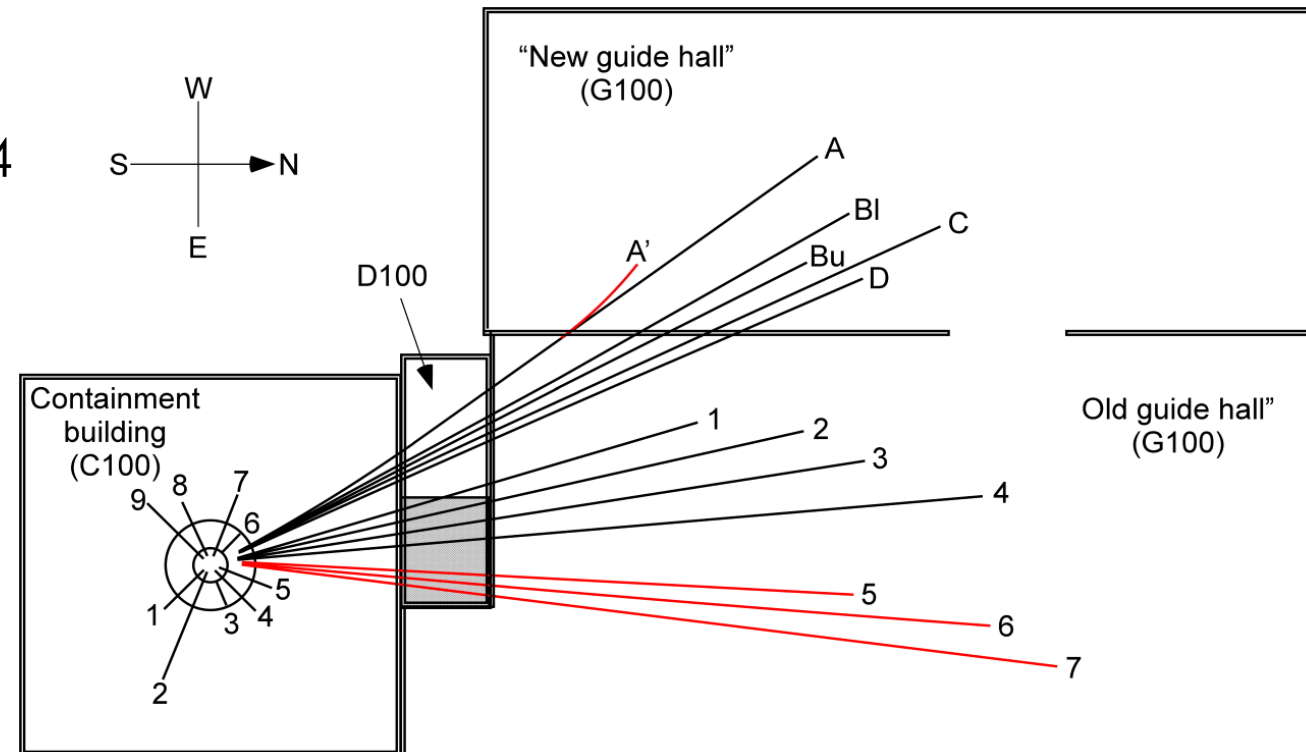

- Despite extensive clean-up efforts, ≈ 1 gm of fissionable material remains near the core
- Plan developed to clean reactor internals further
 - Underwater power washing: summer and fall of 2024
- Conduct reactor operations post-cleaning

Neutron Guide Upgrade

- Replace neutron guides 5, 6, & 7 (red) in 2024
 - Improve performance of nine instruments from 1.5x to 10x

New Neutron Source Workshop

- “Neutrons for the Future” held Oct. 2023
 - 200+ scientists from across the U.S.
 - Final report in preparation

Select Public Engagements

- **Small Business Innovation Research (SBIR) Program**
 - Awarded nearly \$3 million to 15 small businesses in 9 states
 - Supports R&D and commercialization projects
- **Curricula Development Cooperative Agreement Program**
 - Awarded \$1.1 M to 8 universities to support standards education in undergraduate, graduate curricula
 - Supported by the Standards Coordination Office
- **Baldrige Reimagined**

NIST Awards Ceremony

New Telework Guidance Effective 1/1/24

- Designated Tuesdays and Thursdays as NIST Community Days
- Clarified eligibility for up to 2 or 4 days of telework per week based on position duties
- Clarified situations where remote work can be authorized as a strategic management tool

Thank you!
