

# Harmonizing Model-Based Standards for Shipbuilding

## MBE Summit

April 17, 2024 Chicago, Illinois

Presenters:

Ryan Bounds HII-Newport News Shipbuilding

# Bio

## Ryan Bounds, Design Engineer Model-Based Engineering

- AAS in Mechanical Engineering Technology
- BA in History from Texas A&M University
- Model-Based Definition lead developing the model-based standards strategy for NNS's digital evolution
- 10+ years in shipbuilding
  - Manufacturing
  - Instructor (GD&T Evangelist & MBD practices)
  - Design Engineering
  - Manufacturing Engineering
  - Model-Based Engineering
- GDPT-2009 Senior Level

# Presentation Topics

- HII-Newport News Shipbuilding (NNS) Overview
- Problem Description and Objective
- Lines of Effort
- Discussion/Conclusion

# HII SHIPBUILDING DIVISIONS

Providing Advanced Digital Products

## NEWPORT NEWS SHIPBUILDING

**Ford-Class**  
Aircraft Carrier  
Programs

**Submarine Programs**  
New Construction

**Aircraft Carrier Refuelings**  
(RCOH) & Inactivation

**Submarine Onsite and  
CVN Offsite Fleet  
Support Programs**

**Engineering and  
Planning Yard  
Programs**

**Kenneth A. Kesselring**  
Site Operations

## INGALLS SHIPBUILDING

**America-class**  
Large Deck  
Amphibious Assault  
Ships

**San Antonio-class**  
Amphibious Transport  
Dock Ships

**Arleigh Burke-class**  
Aegis Guided Missile  
Destroyers

**Legend-class**  
National Security  
Cutters

## MISSION TECHNOLOGIES

**Cyber & Electronic  
Warfare**

**Live, Virtual,  
Constructive Solutions**

**Fleet Sustainment**

**Nuclear &  
Environmental Services**

**Intelligence,  
Surveillance &  
Reconnaissance**

**Unmanned Systems**

# About Newport News Shipbuilding

- **Sole designer, builder and refueler** of U.S. Navy aircraft carriers
- **One of only two U.S. shipyards** capable of designing and building nuclear-powered submarines
- **Designs, builds, maintains and inactivates** the most advanced ships in the world using expertise in nuclear propulsion, naval design and manufacturing
- **Largest industrial employer** in Virginia

**Ford-Class**  
Aircraft Carrier Programs

**Submarine Programs**  
New Construction

**Aircraft Carrier Refuelings**  
(RCOH) & Inactivations

**Submarine Onsite and CVN Offsite Fleet Support Programs**

**Engineering and Planning Yard Programs**

**Kenneth A. Kesselring Site Operations**

# Why Go Digital?

## Manufacturing Demands

“Manufacturing Need for Technology Efficiency at Scale”—Matt Needy (NNS VP, ShipTech 2024)

## Standards Contribution

- Repeatable solutions
- 1st time quality/accuracy
- Data exchange and efficiency
- Outsourcing interoperability (6 million man-hours per year)
- Digital thread sustainment (Navy)
- MBSE Requirements management
  - Traceability
  - Certification
  - Early validation
- Drawingless Products
- Clear end-user interpretation/understanding

# Problem Description and Objective

Current standards that address digital needs are limited and legacy data-based.

Define and perform work for activities that will ensure efficient data development, management, and exchange for engineering and manufacturing operation activities for a new digitally designed Naval program.

*Define standards that support the way ships are designed, built, and maintained.*

### Shipbuilding Model-Based Standards must support:

- Assembly configurations for design & build
- Data exchange between partners and customers
- Integration between internal PLM and ERP Systems
- Integration with external Systems (Navy)
- Automation of derivative products for build / test & inspect prod
- Advanced simulation & predictive models (Digital Twins)
- Data that will persist for the lifecycle (30-50 years)

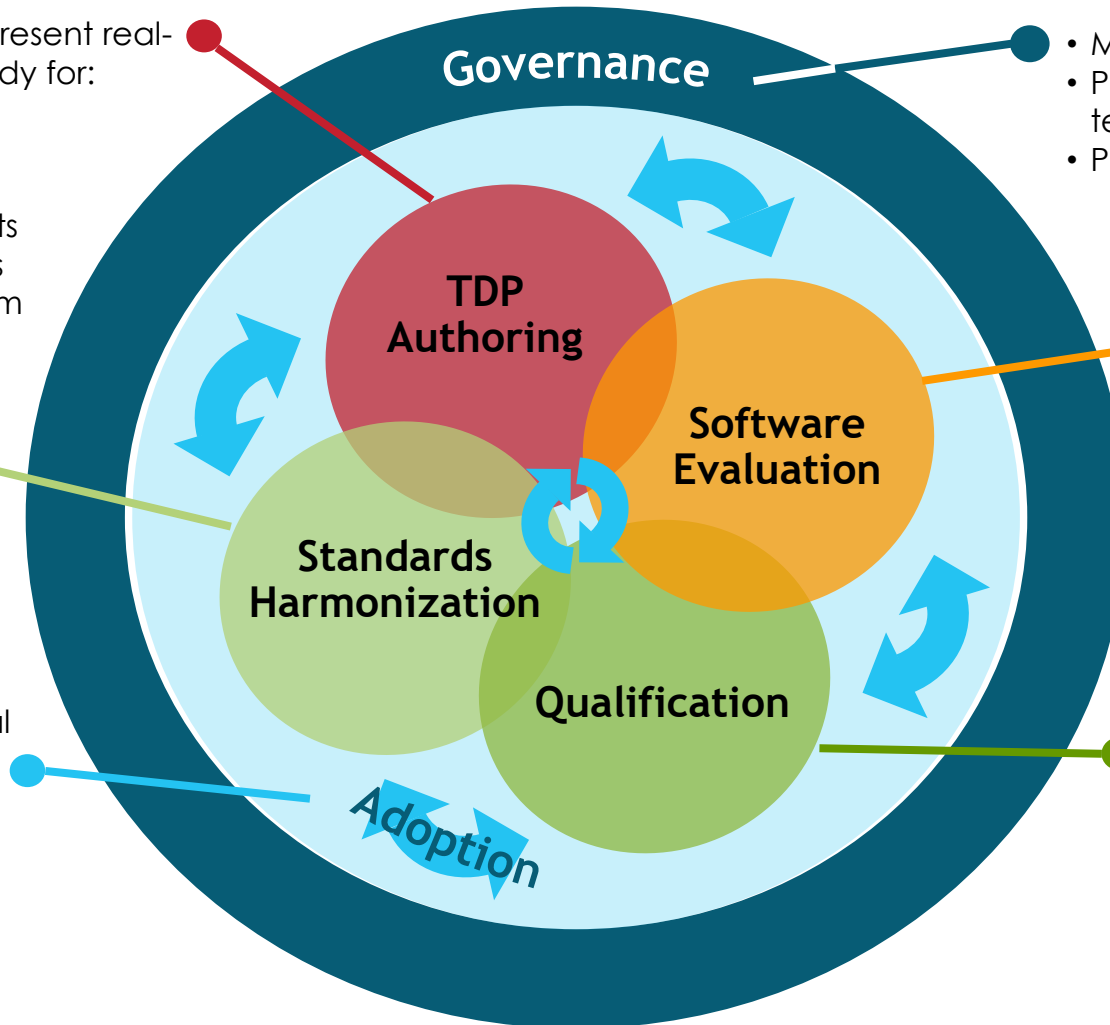

# Lines of Effort

- Author 3D Technical Data that represent real-world designs and are digitally ready for:
  - Manufacturing
  - Quality
  - Sustainment
- Produce native and neutral formats to be tested against the Standards and Tools by the Qualification Team

- Review existing standards
- Identify gaps
- Write new standards
- Continuously manage standards, iterate and update over time

- People-focused use of 3D Technical Data including:
  - OCM guidance & expertise
  - Workforce transformation
  - Workforce communications
  - Workforce training
- Facilitation guidance to teams

- Maintains Mission and Vision
- Provides operating guardrails for teams to work within
- Provides guidance when teams stall

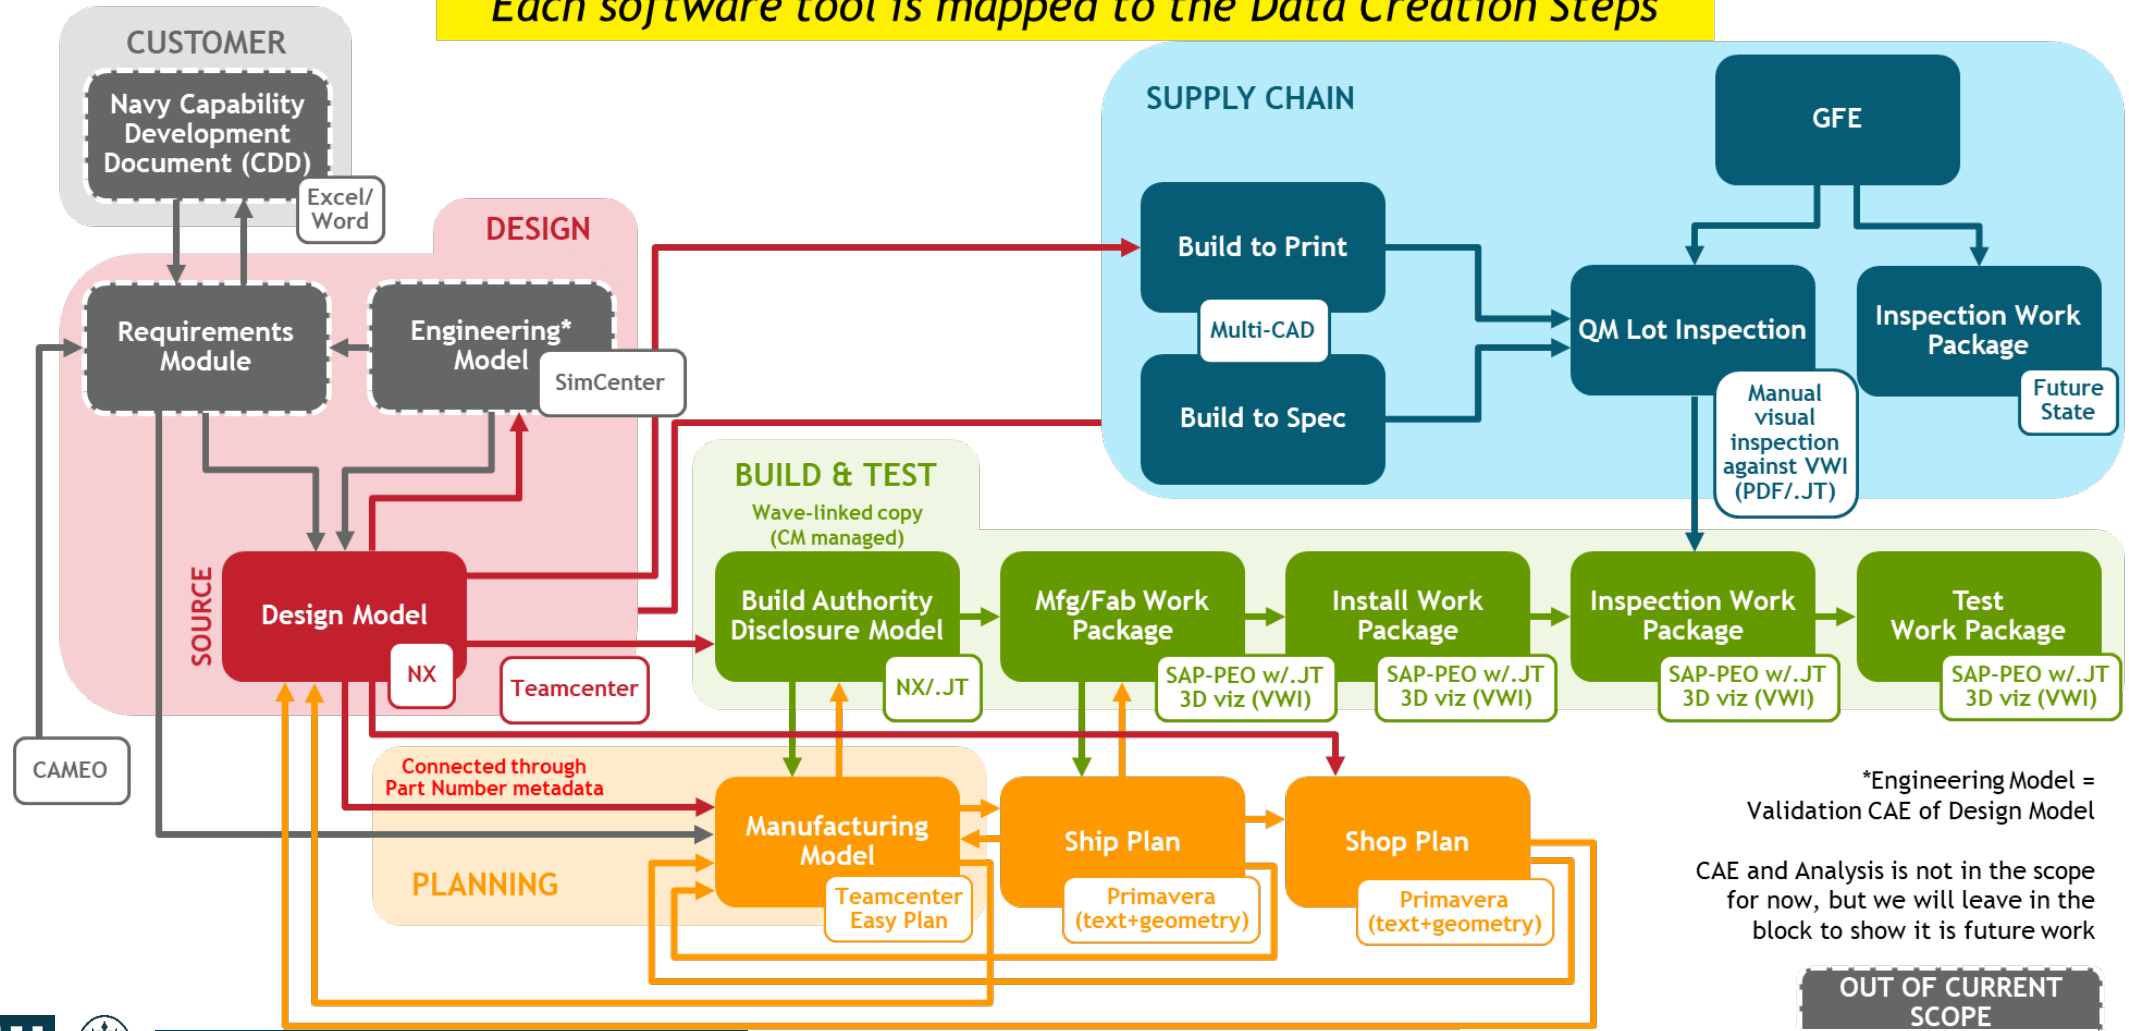

- Evaluate software tools for: Interoperability, Data Exchange, Security
- Review software tools: Available, Emerging, Posit future state technology needs

- Evaluate 3D Technical Data Examples for digital-readiness using:
  - Software Tools
  - Standards
  - Examples
  - Report results

# HII-NNS Planned Digital Environment

Each software tool is mapped to the Data Creation Steps

\*Engineering Model = Validation CAE of Design Model  
 CAE and Analysis is not in the scope for now, but we will leave in the block to show it is future work

OUT OF CURRENT SCOPE

# Use Cases

## Design

1. Design Review
  - a. Part
  - b. Assembly
  - c. System\*
2. Engineering Changes
  - a. Part
  - b. Assembly
  - c. System\*

## Planning

1. Ship Plan
  - a. Part
  - b. Assembly
  - c. System\*
  - d. Modules\*\*
2. Shop Plan
  - a. Part
  - b. Assembly
  - c. System\*
3. Manufacturing Model
  - a. Part
  - b. Assembly
  - c. System\*

## Build & Test

1. Fab Work Package – Part and Components
2. Install Work Package – Assembly
3. Inspection Work Package
  - a. Part
  - b. Assembly
  - c. System\*
4. Test Work Package

## Supply Chain

1. Build to Print
2. Build to Spec
3. Inspection Work Package
4. Receipt Inspection

\*System: Refers to a specific functional area (e.g., structural, electrical, piping)

\*\*Modules: Refers to a strategic boundary within the ship that includes many systems

*This list is not exhaustive. New use cases will arise as the project develops.*

# Standards

## Design

- ASME Y14
- LOTAR
- QIF (Quality Information Framework)
- ISO 10303 (STEP & PLCS)
- SAE EIA-649-1 (Configuration Management)
- MIL-HDBK61A (Configuration Management)

## Planning

## Build & Test

## Supply Chain

- NAVSEA 9090-700E (SCLIS)
- S-Series

- MTConnect
- ASME, ASTM (Process Standards)
- ISO 16949 (IATF AIAG Quality Management System)
  - ASME Y14, B46, B89
  - SAE AS9000, AS9102
- QIF (Quality Information Framework)

- ISO 14306, 14739-1 (3D Viewables)
- SAE EIA-649-1 (Configuration Management)
- MIL-HDBK-61A (Configuration Management)
  - ISO 10303 (STEP)

- MIL-STD 881F (Work Breakdown Structure)
  - MIL-STD 31000B
  - DoDI 5000.97
  - MIL-HDBK-539
  - Dev/Sec/Ops?

# Cohorts

*Supply chain vendors have personas in each cohort that match the HII-NNS personas*

## Authors

Authors 3D Data  
Creates standardized  
Data and Refers to  
Standards

- Repair Officer/Lead, USN
- Design Engineers
- Quality Engineers
- Manufacturing Engineers
- Tooling and Fixturing
- CAD Administrator

## Analysts

Reads and Manipulates  
3D Data  
Uses Standardized Data  
and Refer to Standards

- Specialist, USN
- Quality Assurance, USN
- CNC Programmers
- CMM Programmers
- Machinists
- Procurement Specialist

## Consumers

Reads 2D Drawings  
Today, Needs to Read  
and use 3D data  
Uses Standardized Data

- Supply, USN
- Operator, USN
- Inspectors
- Assembly Teams
- Technical Writer
- Area Planner

## Command

Needs to Know the Value  
of 3D Data  
Refers to Standards

- Command, USN
- Executives
- Management
- Sales
- Document Control
- Supply Chain Manager

# Personas

**USN**

The following table lists the employees shown in the image, organized by their department color coding:

Employee Name	Employee Title
Shawn	Repair Officer/Lead, USN
Lindsey	Planner, USN
Aaron	Team Lead, USN
Luke	Supply, USN
Ethan	Team Member, USN
Aj	CAD Administrator
Tyler	Product Design
Bob	Product Design
Olivia	Operator, USN
David	Specialist, USN
Amy	Quality Assurance, USN
Christopher	Command, USN
Tim	Fixtures & Jigs
Aya	CAD Administrator
Mike	Mfg Planner
Quintana	Quality Engineer
Fiona	Systems Engineer
Steve	Shipyard Supervisor
Ada	Computer
Paula	PLM Administrator
Rich	Facilities & Equipment
Frank	Trades Specialist
Jake	Machinist
James	CNC Programmer
Jordan	Digital Metrologist
Rebecca	Configuration Mgr
Rhonda	Electric Assembly
Danielle	Materials Routing
Brian	Procurement Spec
Raymond	Shipfitter
Alison	Electric Assembly
Kyle	Processing Tech
Georgette	Processing Tech
Christine	C-Suite
Carl	VP Engineering
Victor	VP IT
Tina	Supply Chain Mgr
Erica	Engineering Mgr
Armand	Technical Writer
Melissa	Product Line Mgr
Fred	Assembly Tech
Denise	Quality Mgr
Walter	Inspector
Garrett	Assembly Tech
Vivian	Area Planner
John	Plant Manager
Isaac	IT Manager
Gloria	Govt Contracts
Penny	Process Improvement

Create Standardized Data and Refer to Standards

Use Standardized Data and Refer to Standards

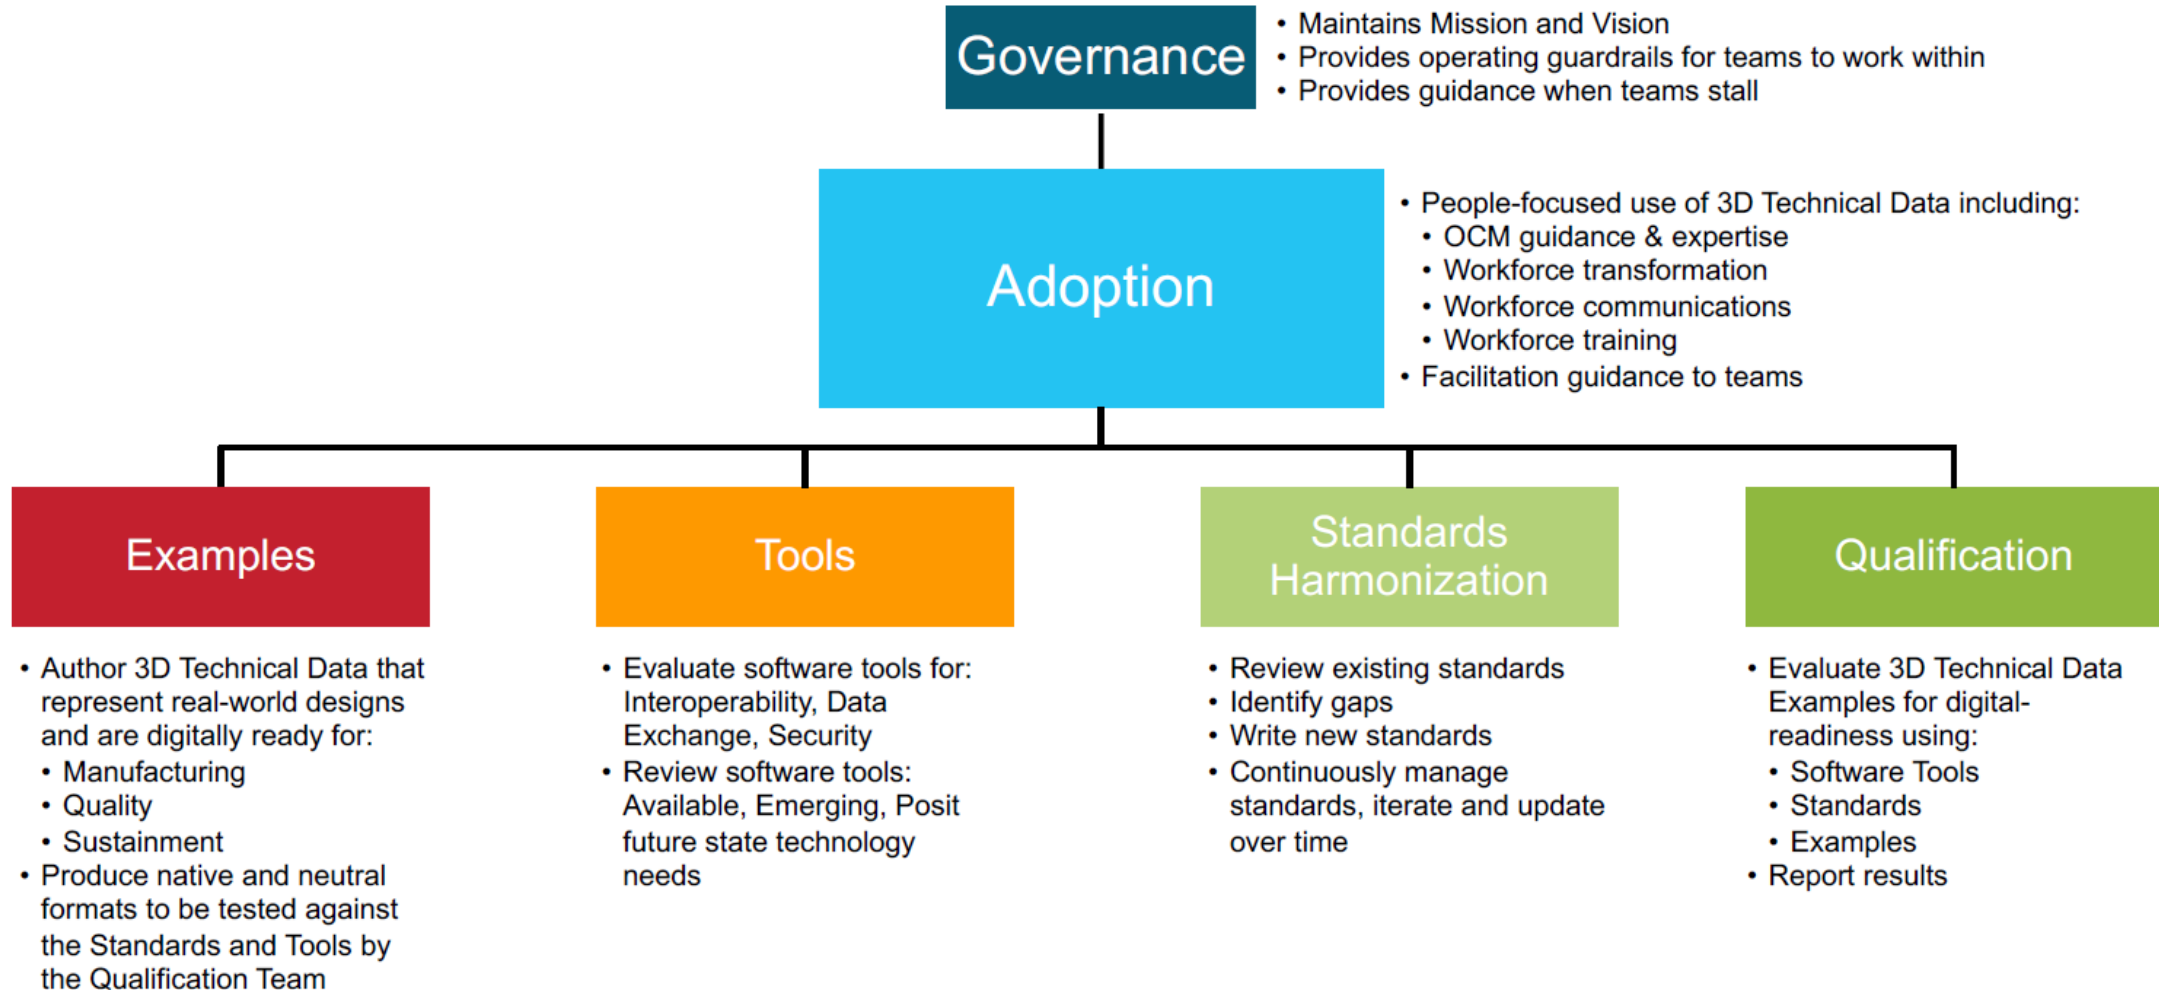

Use Standardized Data

Refer to Standards

# Develop & Implement a Standards Strategy

Team being Established Currently

# Thank You for your Attention...

# Discussion
