UOCAVA 2012 Post-Election Survey of Local Election Officials-DRAFT Survey Questions

Q. #	Topic	Database source	Likely Source level	Issues for Consideration	Procedural/Data Classification	State/Local Impact
1	# of total registered and eligible voters	Count of Eligible voters (pollbook fil	State/Local	Verification of UOCAVA voter inclusion in pollbook file		
2	Registered and eligible voters-UOCAVA-by address (APO, Domestic, Overseas Civilians)	Absentee Voter-EM Module	State/Local	Requires sourcing of UOCAVA voters based on address	Both	requires sourcing of FPCAs by address, source
3	# of FPCAs received-by source pre-45 day deadline (mail, fax, e-mail, online tool)	Absentee Voter-EM Module	State/Local	Requires date-time stamp for processing of FPCAs	Both	Proper data entry to reflect 45 day cutoff
3	# of FPCAs received-by source post-45 day deadline	Absentee Voter-EM Module	State/Local	Requires date-time stamp for processing of FPCAs	Both	Proper data entry to reflect 45 day cutoff
4	# of FPCAs rejected-by address	Absentee Voter-EM Module	State/Local	Requires State/Local to log FPCA rejections-Likely, but not classified currently by source addr	Both	Proper classification of rejection and source address
5	# of FPCAs rejected for receipt after absentee ballot deadline	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific reason codes for rejection of FPCAs	Both	Proper classification of FPCA rejections
6	# of non-FPCAs rejected because of receipt before 45-day deadline?	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
6	# of non-FPCAs rejected because of receipt after 45-day deadline?	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
7	# of non-FPCA registrations/absentee ballot requests rejected by source address	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
8	# of non-FPCA registrations/absentee ballot requests rejected by source address due to receipt after voter registration/ballot request dead	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
9	# of UOCAVA absentee ballots transmitted grouped by source and address before 45 day deadline	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
9	# of UOCAVA absentee ballots transmitted grouped by source and address after 45 day deadline	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
10	# of UOCAVA absentee ballots returned as undeliverable grouped by address (excluding FWABs/SWABs)	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
11	# of UOCAVA absentee ballots cast grouped by source and address	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
12	# of UOCAVA absentee ballots returned, but rejected-by address	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
13	# of UOCAVA absentee ballots returned, rejected for receipt after statutory deadline (exluding FWAB/SWABs)	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
14	# of UOCAVA absentee ballots counted grouped by source address (excluding FWABs and SWABs)	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
15	# of FWABs cast by UOCAVA voters	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	FWABs not typically logged separately
16	# of FWABs cast by UOCAVA voters and rejected	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	custody controls must be in place prior to final processing of ballots
17	# of FWABs cast by UOCAVA voters and rejected due to receipt after deadline	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	
18	# of FWABs cast by UOCAVA voters and counted	Absentee Voter-EM Module	State/Local	Requires configuration of database to specific codes	Both	

All of these data elements can be accommodated through EM/Absentee voter modules with the inclusion of the following database fields/codes:

Transaction Event
Date Time Stamp for all processing entries of FPCA/FWAB
Address Codes for source of FPCA/FWAB (APO, Overseas Civilian)
Classification for methods of transmission (mail, fax, e-mail, online tool) and receipt
Absentee Ballot Processing Rejection Codes
Absentee Ballot Application Rejection Codes
Classification for receipt and processing of FWABs
