**Subject:** W.r.t governance, consider referencing: ISO/IEC 38507:2022 Governance implications of the use of artificial intelligence by organizations

To Whom It May Concern,

If possible, please be aware of the following:

ISO/IEC 38507:2022 Information technology- Governance of IT - Governance implications of the use of artificial intelligence by organizations

When developing the "AI Risk Management Framework", usage and appropriate reference to ISO/IEC 38507:2022, especially in "AI Risk Management Framework" Section 6.1. Govern, may help to strengthen the planned framework.

That is, much use of ISO/IEC TS 5723:2022 was made in defining some crucial terms, e.g., safety. Similar approach to leverage the work in ISO/IEC 38507:2022 could be considered.

Note: NIST AI RMF Playbook seemed to be void of additional guidance w.r.t. Governance, so it might also benefit from ISO/IEC 38507:2022.
