With respect to NIST–2021–0004, the Artificial Intelligence Risk Management Framework, I would recommend that you begin with Isaac Asimov’s “Three Laws of Robotics” in *I, Robot*:

1. A robot may not injure a human being or, through inaction, allow a human being to come to harm.
2. A robot must obey the orders given it by human beings except where such orders would conflict with the First Law.
3. A robot must protect its own existence as long as such protection does not conflict with the First or Second Law.
