Line 890 – Reference to ISO/IEC 20243:2015 which was replaced by ISO/IEC 20243-1:2018

Line 965 – References ISO/IEC 27017:2105 – there is a typo at the end, it is 2015 not 2105

Bullet points under line 769 “Implementation of cryptographic techniques provide...”

I do not believe that “Non-repudiation” should be a separate bullet point as it is provided through “Integrity”. This is described correctly under 1244 “Cybersecurity Objectives” where “non-repudiation” is under “Integrity”.

Thank you,

Boris
