**Subject:** Privacy Framework Comments

Dear Ms. MacFarland,

Hope I'm not too out of the loop here, but I would love to see an informative reference section in the privacy framework, that maps to NIST 800-53 Rev 5. (It is definitely one of my favorite parts of the CSF.) I know that the new version (Rev 5) is not out yet, but I think it would be great to add the references as a placeholder until the new framework is published. I would also like to see how the framework maps to / addresses GDPR and CCPA. I think this would greatly add to the more widespread adoption of the privacy framework.

Thank you for your consideration!

Thx,

---
