

Welcome to the SQLite Data Recovery module for Federated Testing Lite on (Windows 10)  
Simply download the 3 items below and begin testing as defined in the module for SQLite as part of the Federated Test tool testing environment.

You must download the Federated Lite Tool here: [Federated Testing Project | NIST](#)

An SQLITE dataset is available from <https://cfreds.nist.gov/> that contains database tables that can be used in the testing process.

1. SQLite Databases (Header and Table info) <https://cfreds.nist.gov/all/NIST/SQLiteDatabasesHeaderandTableinfo>
2. SQLite Data Recovery (deleted and modified records) <https://cfreds.nist.gov/all/NIST/SQLiteDataRecoverydeletedandmodifiedrecords>
3. SQLite Database containing BLOB data <https://cfreds.nist.gov/all/NIST/SQLiteDatabasecontainingBLOBdata>
