Subject: FW: NIST Released Draft NIST Interagency Report (NISTIR) 8074, Report on Strategic U.S. Government Engagement in International Standardization to Achieve U.S. Objectives for Cybersecurity

Hi Pat,

It would be helpful if the report could go into more detail regarding the NICE activity. The importance of mapping resources to the NIST critical infrastructure, alignment of skills/KSAs, courses to competencies and specialty areas and assessments. I am on a NICE workgroup for private sector and see this as well as framework extensions as key to supporting the NIST infrastructure globalization effort for private sector.

Hope this is helpful

Kind Regards,

Frank
