Subject: Beating the deadline for comments

Some ideas for consideration on the labeling project.
(Whether more criteria are needed, including criteria that specifically address other components of the product beyond the device)
Software development process? do we want to know if they follow security minded processes?
* Software Development Life Cycle?
* Mitigating the Risk of Software Vulnerabilities by Adopting a Secure Software Development Framework (SSDF)

Tamper protection? Can anyone open a box and change things easily? Is there a level of protection?

Standards used in IoT?

Thank you,

Gabriel Martinez
