It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

*Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the **creation of a new government entity, the National Institute of Forensic Science**, to establish and enforce standards within the forensic science community.

NATIONAL COMMISSION ON FORENSIC SCIENCE

 **NIST**  
National Institute of Standards and Technology  
U.S. Department of Commerce

In 2013, the Department of Justice (DOJ) established the National Commission on Forensic Science, in partnership with the National Institute of Standards and Technology (NIST), to enhance the practice and improve the reliability of forensic science. This unique partnership draws upon each agency's core strengths to promote scientific validity, reduce fragmentation, and improve federal coordination of forensic science.

The Commission is co-chaired by Deputy Attorney General James M. Cole and NIST Acting Director and Acting Under Secretary of Commerce for Standards and Technology, Willie May. Nelson Santos, Deputy Assistant Administrator for the Office of Forensic Sciences at the Drug Enforcement Administration, and John M. Butler, Special Assistant to the NIST Director for forensic science, serve as vice-chairs. Brette Steele, Senior Advisor on Forensic Science and Senior Counsel to the Deputy Attorney General serves as the Designated Federal Officer and Robin Jones, Consultant within the Department of Justice, serves as Program Manager.

The Commission includes federal, state and local forensic science service providers; research scientists and academics; law enforcement officials; prosecutors, defense attorneys and judges; and other stakeholders from across the country.

- provide technical leadership necessary to facilitate the development and promulgation of **consensus-based documentary standards and guidelines for forensic science**
- promote standards and guidelines that are **fit-for-purpose and based on sound scientific principles.**
- promote the use of OSAC standards and guidelines by accreditation and certification bodies
- establish and maintain working relationships with other similar organizations.

This worksheet is intended to assist in reviewing a potential standard or guideline to determine its appropriateness for inclusion on the OSAC Registries. Depending upon the nature of the standard or guideline, not all areas will be applicable. Additional factors may be needed for the evaluation of standards relating to observational- and judgment-based practices or human factors such as training, qualifications, research and
