

OSAC Registry Approved Standards

FY 2016

The Organization of Scientific Area Committees (OSAC) for Forensic Science Registry serves as a trusted repository of high-quality, science-based standards and guidelines that address discipline-specific forensic science needs. Documents posted on the OSAC Registry have been developed using a consensus-based process that allows participation and comment from all relevant stakeholders and have been assessed to be sound by forensic science practitioners, academic researchers, measurement scientists and statisticians.

The following **three** documents were effective on the OSAC Registry at the end of fiscal year 2016 (ending September 30, 2016):

Fire and Explosion Investigation

- NFPA 921 Guide for Fire and Explosion Investigation, 2014 Edition (*effective September 20, 2016*).

Seized Drugs

- ASTM E2329-14 Standard Practice for Identification of Seized Drugs (*effective January 27, 2016*).

Interdisciplinary

- ISO/IEC 17025:2005 General Requirements for the Competence of Testing and Calibration Laboratories (*effective September 27, 2016*).
