IBPC 2010 :: Scope

- **Scope is performance**
 - How to define it
 - How to plan
 - How to drive it
 - How to get it (systems)
 - How to procure it
 - **How to know you've got it**
 - How to certify it
 - How it's not the whole story!
- **Testing**
 - Technology testing
 - Emerging modalities
 - Operational testing
 - Security, vulnerabilities
- **Testing ...**
 - Template protection
 - Novel test methods, metrics
 - Specification, requirements, certification
 - Accuracy, security, operational
 - Emphasis on how to test
 - Not about the latest results
 - Bias toward “applied biometrics” + “operationalization”
- **Three Satellite workshops**
 - Template Protection
 - Fingerprint quality
 - Fingerprint markup
