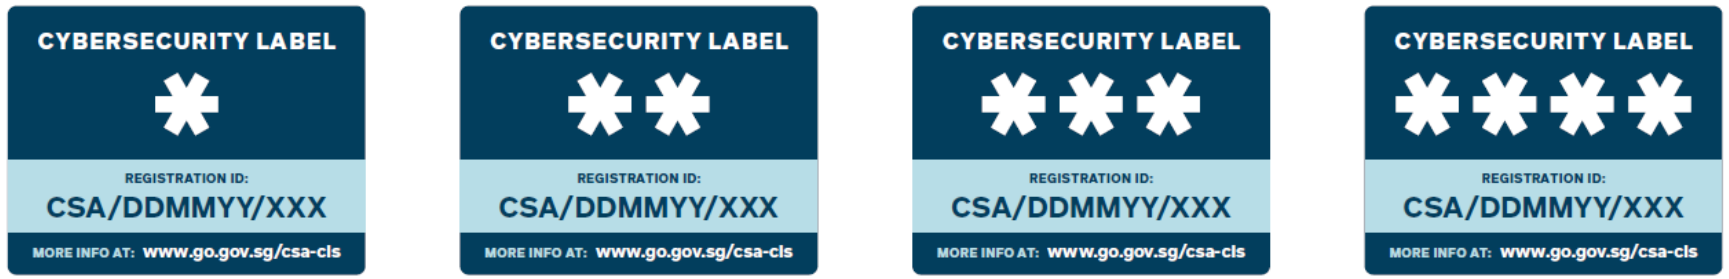
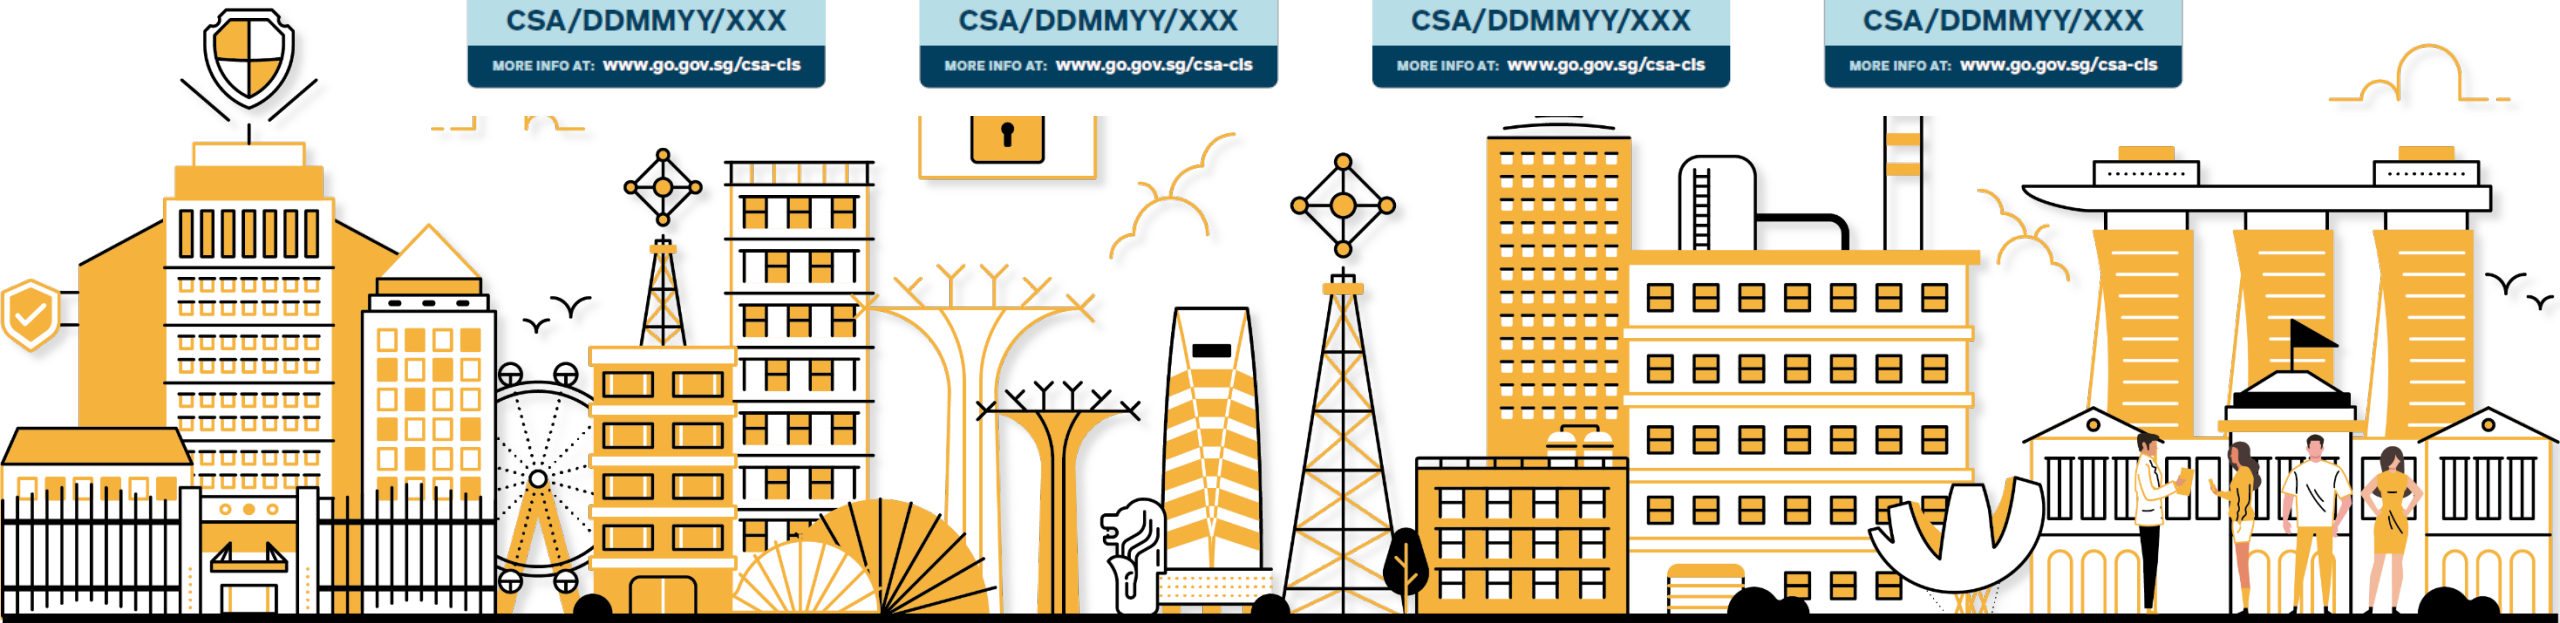
Cybersecurity Certification Centre
CYBER SECURITY AGENCY OF SINGAPORE

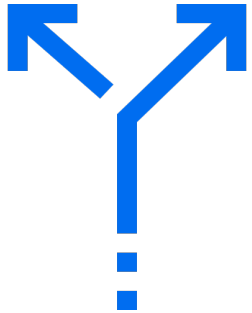
Cybersecurity Labelling Scheme

BY CYBER SECURITY AGENCY OF SINGAPORE





Intent of Cybersecurity Labelling Scheme



CONSUMERS

Making cybersecurity provisions transparent to consumers and enabling them to differentiate against poorly secured devices

DEVELOPERS

Help manufacturers to differentiate themselves in the market and thus, incentivise manufacturers to produce more secure devices

ECONOMY

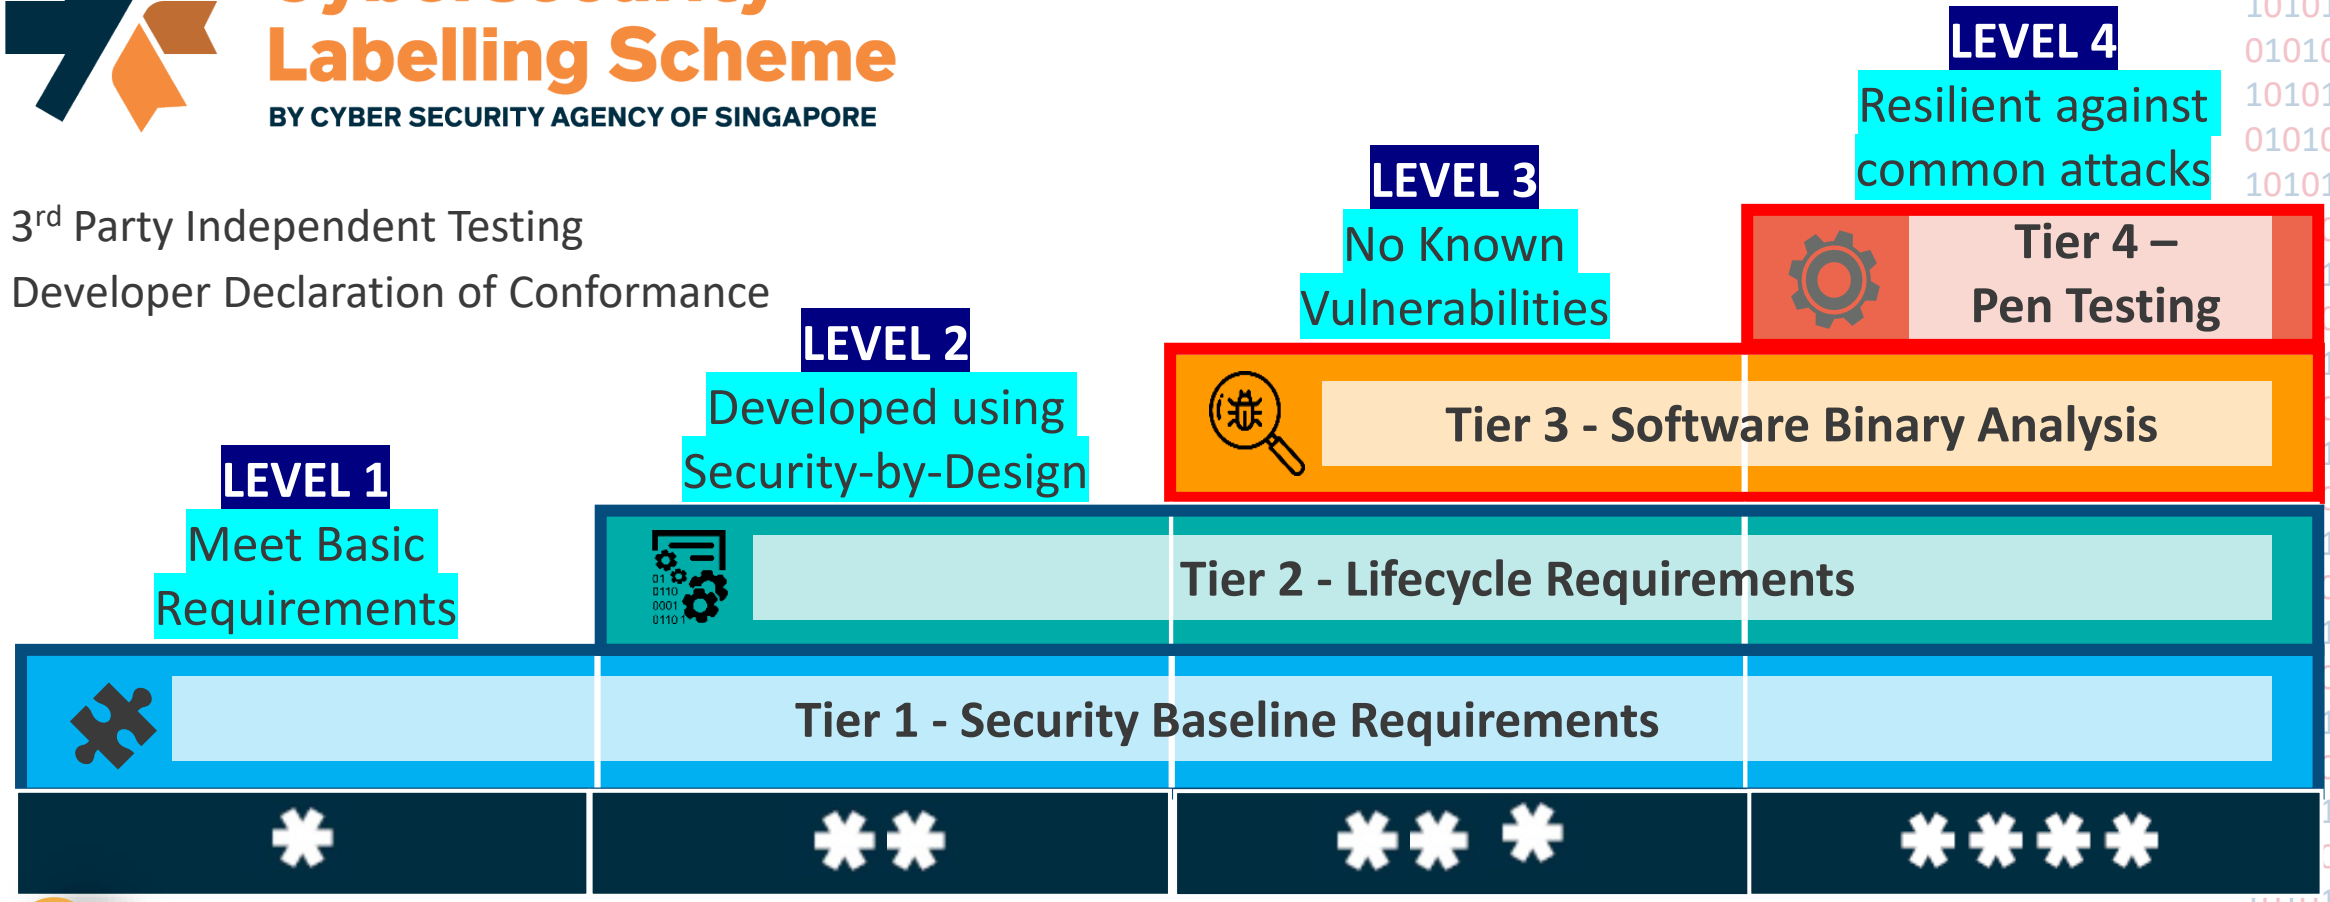
To grow the economy, working with International Partners for mutual recognition to reduce duplicated testing and improve market access

- **Reduce attack surface, enhance security**
- **Safer & more secure cyberspace**

Cybersecurity Labelling Scheme

BY CYBER SECURITY AGENCY OF SINGAPORE

- 3rd Party Independent Testing
- Developer Declaration of Conformance



1. Robust & Comprehensive : Caters for consumers, developers and economy
2. Flexible & Cost Effective: Combination of self-declaration and 3rd party independent testing caters to different needs and risk appetite
3. Mix of soft & hard lever : Primarily voluntary scheme; Mandated for specific critical devices (e.g. Wi-Fi router)
4. Interoperable: Leveraging on widely adopted standards to facilitate mutual recognition

Labelled products ....
