Hello team of NIST,

I wanted to, first, congratulate you and your team for the remarkable effort put into enhancing and releasing the new version of the NIST CSF.

After detailing reviewing, I found, inside Appendix C. Framework Core, a couple of typos and points of improvement that you might find interesting

- **Page 37**: Within the subcategory of PR.DS-01, I've noticed a typographical error, it appears as "PR-DS.05," but according to the standard, it should read as "PR.DS-05."
- **Page 39**: I've come across a discrepancy in the text for "PR.PT-04." It states, "Dropped (moved to PR.AA-07, PR.IR-01)." However, it seems there is no reference to "PR.AA-07" in the Draft, rather it should likely be "PR.AA-06." This also appears to be a typographical error.

I look forward to your response and future advancements,
Mafalda
