So based on an audio visual presentation like this one I would give a review of 4.5/5 because they were trying to say about promoting growth about 1.7 times with MEP manufacturing extension partnership program since 2010 with Bogert group CEO and CFO represent an innovative cashflow increase about 10000 % of dollar growth in united states with extensive partnership programs with mexico and Puerto Rico so its an increase in manufacturing sectors of us government with Headquarters in Washington district and other parts of USA of growing dollar rate growth in other manufacturing countries like India mexico etc I would like to get more info on telecom growth also with manufacturing sectors of manufacturing extension partnership program I heard PWC partners with Google and alphabet inc for a very good telecom functioning of fiber growth in telecom audio visual content and also medical devices produced by them for various business related factors I would give them 4.5/5 as well with Verizon and at&t the worser affective companies in this manufacturing extension partnership program
