The DNG-ISAC and its participants support the responsible and professional use of PNT assets.

We see this as largely a vendor issue since neither the DNG-ISAC nor its participants are likely to develop their own PNT or add frequencies.

Responsible use includes following manufacturer's instructions.

We trust the IoT onboard is secure and within the required band.

**Jim Linn | Chief Information Officer | [American Gas Association](#)
| Executive Director | [DNG-ISAC Downstream Natural Gas Information Sharing and Analysis Center](#)
400 N. Capitol St., NW | Washington, DC | 20001**

Schedule a meeting with me:

The American Gas Association represents more than 200 local energy companies committed to the safe and reliable delivery of clean natural gas to more than 70 million customers throughout the nation.

The DNG (Downstream Natural Gas) ISAC serves natural gas utility (distribution) and pipeline (transmission) companies by facilitating communications between participants, the federal government, and other critical infrastructures.
