The TGDC and
the Common Data Format

Professor Patrick McDaniel
P1622 Workshop
February 8, 2011

Overview

- The Technical Guidelines Development Committee (TGDC) is an advisory group for EAC

    ‣ Technical recommendations for technical/procedural policy

    ‣ Developing Voluntary Voting System Guidelines (VVSG) 2.0

    ‣ Committee: Election officials, academics, vendors, accessibility exports, NIST director

    ‣ Strong technical support from NIST research staff

"The TGDC sees common data formats such as those being defined by the P-1622 body as key to supporting standards and increasing the accessibility, security, and audibility of future elections."

CDF-Upcoming Needs/Efforts

- *Immediate* : Establishment of CDF subgroup of TGDC

  - ‣ Decided Jan meeting, will convene soon

  - ‣ Likely use OASIS and P-1622 guidelines as starting point

  - ‣ Input welcome (mcdaniel@cse.psu.edu)

- *Summer 2011* : OUCAVA pilot projects guidelines

  - ‣ 2012 election will support remote voting for OUCAVA voters

  - ‣ Will attempt to identify successes and failures of fielded systems.

    - Metrics being developed within TGDC subgroup

- *Fall 2011* : scheduled delivery of common data format specification for blank ballot delivery systems
