**Subject:** [pnt-eo] Leveraging GPS/Time/5G IoT

**Categories:** Red Category

Good day , I'm hoping this information will be combined with other data to reflect current real time application of these (Aggregate) Spikes in our technology wheel, Logii, my company is tactically using services to keep track of my vehicles and launch small apps to react in real-time to GPS positioning and scheduled activities.

Ex: When a vehicle enters New Jersey from NY, my cell phone using common software , ITTT, on entering NJ, a text is sent to my email, which also uses logic (macros) to read the message and execute Logii's daily processes.

Thank you,  
Gregg Dotoli
