

TGDC Priorities

- Security, U&A WGs focus on areas clearly in scope. Look at current VVSG scope and use as guideline
- Continue push to create Common Data Format
- Research general security, U&A recommendations for ballot delivery & ballot-marking [including online, but not return], BOD, results reporting
- Auditing – explore general recommendations for types of auditing systems can or should support and system functions to support it
- Moving forward w/general research re: QA, CM, Hardware, software quality (coding), etc

- VR/EPBs (outside of ballot activation) out of scope of VVSG 2.0 – NIST/EAC continue to work w/ stakeholders on security & HF concerns
- Begin conversations between cyber/HF/testing regarding auditable systems and accessibility
 - Share legal document with security and discuss implications
- Electronic Return- additional discussions on risks and benefits will be needed
