Good Morning:

I hope this day finds you well.

I think the best suggestion to remove all the barriers to voting would
be to develop a system ware-by a person registers to vote as usual
then they are sent their voting card and a pin#.

Then they vote by phone, and once their pin is used and their votes
have been submited, it can not be changed.
This way people can not decide they want to change their votes. It is
ridiculus that in some states your early votes can be changed.

We know that's how Donald Trump got elected and that is absolutely wrong!

That would cut down on all the long lines, as well as people making
excuses not to vote. Plus then people could vote independently,
without having to ask for help voting. Hopefully this way results
could be counted much faster as well

Please feel free to follow-up should you have further questions, or
possibly a suggestion as to who I can contact regarding my idea.

I reached out to president Obama after he left office, with no response.

Respectfully,

Josh Swatosh. (Austin, TX.)
