General Comment

Voting accessibility helps ensure disabled people have enfranchisement. Barriers to voter registration, lead to inability vote. Requiring ID that you have to pay for when you can't drive is a form of a poll tax. Our SS# should be all the ID needed to register. Registration needs online options with accessible Websites. Mail in ballots improve accessibility but are still barriers to those in rural areas who can't drive. Also to those who are blind or can't use manual writing tools. We need online or electronic ballots so everyone can independently and privately vote. Signature verification or even requiring a handwritten signature is ableist and discriminates against those who can't use manual tools.
