Many thanks for your service to our Nation.

I have been reviewing ISO/IEC TR 24368, "Information technology — Artificial intelligence — Overview of ethical and societal concerns" (August, 2022), a publication of the International Organization for Standardization and the International Electrotechnical Commission (ISO/IEC). It contains much information on artificial intelligence initiatives by ISO/IEC that are candidates for prospective international standards. No doubt you are aware of this work. My comment is a recommendation to you to continued to be well-informed of this activity, which has much international representation.

Charles W. Clark
