

Withdrawn FIPS Listed by Number

Updated 12/15/16

The former Federal Information Processing Standards (FIPS) listed below have been withdrawn. Many of these FIPS had adopted voluntary industry standards for Federal government use, but had not been updated to adopt current or revised industry standards. In some cases, commercial products implementing the standards are widely available.

It is no longer necessary for the government to mandate standards that duplicate industry standards. Federal government departments and agencies are directed by the National Technology Transfer and Advancement Act of 1995 (P.L. 104-113), to use technical industry standards that are developed in voluntary consensus standards bodies.

Information about voluntary industry standards is available from the NSSN: A National Resource for Global Standards at: <http://www.nssn.org>. NSSN is a cooperative partnership between the American National Standards Institute (ANSI), U.S. private-sector standards organizations, government agencies, and international standards organizations.

To request a paper copy of one of the withdrawn FIPS, contact ITL_Webmaster@nist.gov. The FIPS that are available electronically are highlighted and are available at the bottom of this pdf document.
